ASC J2

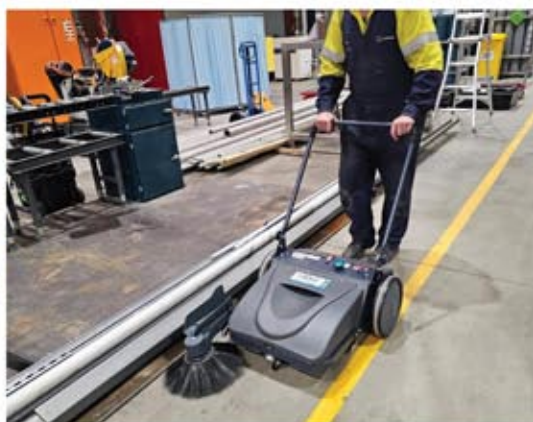

INDUSTRIAL GRADE MANUAL PUSH SWEEPER

ASC J2 Industrial Grade Push Sweeper: Heavy-Duty Cleaning for Demanding Dusty Environments

Take your industrial cleaning to the next level with the ASC J2 Manual Push Sweeper, built to tackle the toughest industrial cleaning tasks in demanding dusty environments.

Unmatched Durability and Performance

The ASC J2 boasts an industrial-grade steel chassis, ensuring unparalleled strength and durability. This heavy-duty sweeper is designed to withstand the rigors of frequent use in challenging environments.

Advanced Dust Control and Debris Collection

Like its sister the standard J1, the ASC J2 features an innovative dust control filter that captures fine dust particles, leaving your floors clean and dust-free. The sweeper's robust design and advanced filtration system make quick work of even the toughest dusty cleaning tasks.

Heavy Duty Design

The ASC J2 is made to last. The machine features a heavy duty steel frame, as well as a rust resistant front and rear hopper. The steel frame helps protect the machine in industrial applications where the machine inevitably gets hit into pallets and machines, while performing the task of labour saving sweeping.

KEY BENEFITS

- Industrial-grade steel chassis for unmatched durability
- Advanced dust control filter for fine dust and debris
- Low maintenance (no electricity or batteries required)
- High efficiency (cleans more area in less time)
- Ideal for demanding industries and environments
