

Eye & ENT Chair | VSM-20V

Why Buy?

Positioning made seamless

Designed with direct feedback and insights from leading Eye, ENT, plastics and dental professionals, the Modsel Eye & ENT Chair features a breakthrough headrest design combining state-of-the-art technology and ergonomics to deliver exceptional functionality when close proximity is required.

Convenient, touch-button controls allow the surgeon and support team to quickly, safely and smoothly adjust the headrest, chair height and patient position throughout the procedure, transport and recovery.

- **Infinitely adjustable headrest** with tilt and height functionality
- **One-touch, electronic control** for precise positioning and minute adjustments
- **Reversible cushioned headrest** with flat or scalloped shape for tailored patient positioning

Application

Ideal for Eye, ENT, plastics and dental care.

Key Benefits

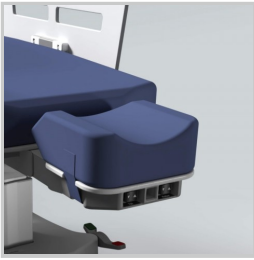

- **Greater throughput:** Patients can remain in the same chair for admission, procedure and recovery, reducing risk and enhancing efficiency.
- **Leading weight capacity:** Modsel stretcher chairs are built with a super strong subframe that can hold and lift a class-leading 400kg/880lb.
- **Supercharged:** The long-life, cordless, fast-charge battery system keeps things moving all day (and night).
- **Clean and hygienic:** The smooth, gap-free platform makes cleaning easy and prevents fluid ingress to meet the highest infection control standards.

Eye & ENT Chair | VSM-20V

Effortless control

Our patented headrest with clearly marked headrest buttons allows for light touch, precise and supportive positioning of the patients head with ease.

Reversible cushioned headrest

Choose flat or scalloped support for optimal patient positioning.

Designed for precision care, the reversible headrest allows clinicians to tailor positioning to the needs of the procedure. Switch between a flat surface and a scalloped cradle to support patient comfort and surgical access.

Low and safe

Excellent 480mm/18.9" low height with fold-under dropsides.

The ultra-low height is combined with dropsides that glide down vertically under the chair top to provide safe access with no protrusions to catch on the patients legs or clothes.

Head and foot tilt

A generous 15 degrees top tilt both directions.

Position a patient how you need them or quickly lower their head down (and feet up) in an emergency.

Simple transfer and patient positioning

Sit or lie your patient flat without affecting the push handle position.

The push handles can be raised for use or stored again independently without interfering with the patient backrest position.

Effortless cornering

Perfectly centered steer wheel for ease of movement.

Lock in the steer system to ensure the chair tracks straight along hallways and then navigates the tightest turning circles possible.

Pillow support accessory

Lightweight frame with removable cushions for added comfort.

Supports a pillow to enhance comfort during recovery. Easy to attach and remove.
