INDUSTRIAL STORAGE SYSTEMS

The Emrack Cantilever Spreader System provides leading sheet & plasterboard manufacturers with an ideal solution for the storage and safe handling of plaster and sheet product—along-side palletised & flexible materials.

FEATURES

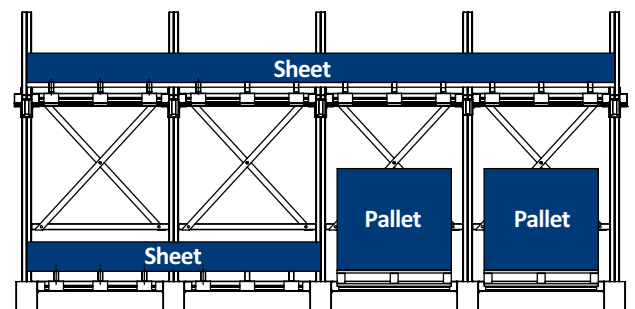

- Store your product perfectly flat always
- Will suit all types of forklift spreader attachments guaranteed
- Easy to Load & Unload
- Fully adjustable & modular design
- Adjustable GLUTS for easy loading

OUR CANTILEVER RACKING ENSURES ZERO SPACE WASTAGE & MAXIMUM OPERATIONAL EFFICIENCY

The unique base loading system reduces the possibility of damage and allows you to efficiently store and manage your full range of pack sizes—with the added benefit of pallet storage—meaning no wasted space ever!

SPREADER SYSTEM DIAGRAM

Our Pallet Support System allows you to store standard pallets alongside sheet products and the unique base loading system maximises space & product access.
