

Munsch Eco Series Extrusion Welders

The Eco Series extrusion welders are developed and made by the world's leader in plastic extrusion welding equipment, Munsch.

Following in the footsteps of the previous SKR series, Munsch has taken all the robust qualities of their previous single heat source extrusion welders; simplified the electronics - resulting in an incredibly strong, bullet proof design.

The Eco Series cleverly utilises Forsthoff's famous Quick-L Hot Air Gun as its heat source. Forsthoff is the world's leading manufacturer of heat guns and hot air blowers, also manufactured in Germany.

You will find the ECO series easy to use, well balanced and a practical and economical addition to your plastic welding arsenal.

SPECIFICATIONS	ECO-M2	ECO-M3	ECO-M5
Maximum welding rate for PP & PE	1.3 Kg/h (3mm) 2.2 Kg/h (4mm)	1.8 Kg/h (3mm) 3.2 Kg/h (4mm)	3.4 Kg/h (4mm) 5.1 Kg/h (5mm)
Welding Materials	PP, PE, PVDF	PP, PE, PVDF	PP, PE, PVDF
Application Range	4-15mm	8-25mm	10-35mm
Weight	4.8 Kg	6.4 Kg	9.6 Kg
Length	450mm	660mm	710mm
Heat Source	Forsthoff Quick—L	Forsthoff Quick—L	Forsthoff Quick—L
Air Preheat	1500W / 230V	1500W / 230V	1500W / 230V
Drive	UX—1 230 VAC	UX—1 230 VAC	UX—1 230 VAC

So for the right advice and competitive pricing for all your plastic fabrication equipment, call us today. Our technical sales team are always available to help.
