

HemoCue — The Original in WBC Point-of-Care Testing

The Right Care Faster

Helping You See the Whole Clinical Picture at the Point of Care

Going from assessment to treatment means having the right clinical puzzle pieces in hand for diagnosis. Something that's impossible to do in one consultation when you need to send samples off for lab work. Yet at HemoCue, we thrive on making the impossible possible for you.

With the HemoCue WBC Systems, we again break new ground in point-of-care testing by giving you access to white blood cell count while your patient is still in the exam room. That makes it possible to completely shift the way you work — not only enabling faster care, but also saving valuable time and money in your practice with a more streamlined workflow. By putting traditional, advanced lab diagnostics inside a microworld, we make WBC results — even five-part differentials — available in minutes. So that you can make more informed decisions right away about antibiotics and further testing, for example. And with over 35 years of experience pioneering point-of-care testing, you can rest assured the white blood cell counts are lab accurate.

Accurate White Blood Cell Count Wherever and Whenever You Need It

HemoCue portable WBC Systems fit in seamlessly wherever you need lab-accurate results at the point of care — from the ultra-modern ER to the most remote village clinic. The systems are ideal for a variety of clinical applications, including primary care, pediatrics, ENT, and more. Whatever your needs, our focus is on giving you the right answers when and where you need them.

Take Advantage of Complete Solutions and Support

We bring together a comprehensive range of equipment, technical expertise and consultative services. Putting it simply, you can rely on us for more than an excellent product.

Products

We strive to make intricate technology simple to use, without compromising accuracy. HemoCue's advanced WBC technology is based on imaging techniques resembling manual microscopy counting. We just simplify, downsize and speed up the process — giving you results in just minutes with absolute lab accuracy. So you can have confidence in providing the right care faster.

Accuracy Starts With Us

Knowledge

A vital part of ensuring accurate results is giving healthcare professionals easy access to training and education. That's why we've poured our 35 years of experience and knowledge into our HemoCue Learning Center so you can have quick access to essential training and current best practices.

Knowledge Starts With Us

Service

We've built a stable infrastructure to ensure you have what you need when you need it. From our worldwide supply network to local representatives, along with our unmatched HemoCue Solution Center, we provide support and delivery assurance.

Service Starts With Us

Because when it comes to caring for people, we refuse to compromise.
