PRPOWER

Power Generation and Mobile Lighting

PR Power is Australia's trusted supplier of sustainable power generation and mobile lighting equipment. Our equipment includes solar hybrid generators, diesel generators, electric battery packs, sustainable lighting towers, standard lighting towers, fuel tanks and load banks. We are committed to providing green innovative solutions for our customers to achieve a Net-Zero emission future. PR Power is supported by world leading suppliers at the forefront of green energy solutions including TRIME, JCB, Cummins and Powerlink.

Our wide range of equipment is available for sale Australia-wide. We understand that access to reliable power and lighting equipment is crucial for our customers which is why we offer 24/7 aftermarket technical support, genuine spare parts and service packages.

Our Vision:

To be Australia's trusted supplier of sustainable power and mobile lighting towers. Powering a green future.

OUR CAPABILITIES

POWER GENERATION

PR Power supply and install internationally recognised diesel generators ranging from 8 kVA to 2,500 kVA. Powered by industry leading brands such as Cummins, Perkins, JCB, Kubota and TRIME. Our sustainable T-ZERO range consists of battery packs and hybrid solar generators. Powering a green future.

MOBILE LIGHTING TOWERS

PR Power supply of range of quality mobile lighting towers. Ideal for civil works, construction, rental, events, mining and industrial applications. PR Power provide urban, mine spec, hybrid and solar lighting towers. All equipped with low-voltage (48V) lighting systems meeting Australian Standards and Guidelines. Improving sustainability without sacrificing performance.

ENGINEERED SOLUTIONS

To suit your specific needs PR Power provides bespoke engineered solutions for your power generation requirements as well providing after-market and technical support from our experienced team Australia wide.

SERVICE, PARTS AND SUPPORT

From installation and commissioning to service packages, PR Power provides 24/7 after-market and technical support from our experienced team Australia wide. PR Power provides a comprehensive service support program for our full range of equipment across Australia.

PR Power provide genuine parts for Perkins, Cummins, TRIME, JCB and Kubota equipment. Our team is committed to quickly and efficiently provide genuine spare parts for our full range of PR Power equipment Australia-Wide.

OUR EQUIPMENT

DIESEL GENERATORS

	PR POWER DIESEL GENERATORS	JCB DIESEL GENERATORS	CUMMINS DIESEL GENERATORS
Brand	PRPOWER	JCB	
Engine Options	Perkins, Cummins & Kubota	Yanmar, Kohler, DieselMax, Cummins & Scania	Cummins
kVA Size	8 kVA - 2,500 kVA	10 kVA - 2,500 kVA	18 kVA - 550 kVA

SUSTAINABLE POWER EQUIPMENT

	BATTERY PACKS	HYBRID GENERATORS	SOLAR HYBRID GENERATORS
Range	T-ZERO PRO	T-ZERO PRO	T-ZERO PRO
kVA Size	5 kVA to 45 kVA	5 kVA to 45 kVA	5 kVA to 45 kVA
Battery	Lithium	Lithium	Lithium

SUSTAINABLE LIGHTING EQUIPMENT

	X-SOLAR POLE	X-HYBRID LITHIUM	X-SOLAR	ECO LED	MINESPEC LED
Range	T-ZERO PRO	T-ZERO PRO	T-ZERO PRO		
Lights	2 x 30W LED	6 x 100W LED	4 x 100w LED	6 x 160W LED	6 x 300w LED
Fuel Usage	ZERO FUEL	0.11 L/h	ZERO FUEL	0.55 L/h	0.55 L/h

OUR PROJECTS

UGL CONTRACTOR SUPPLY PROJECT

PR Power supplied UGL Contracting with **18 x diesel generators** and **12 x LED mobile lighting towers** for their mining and rental project on Curtis Island, QLD. Our equipment ensured uninterrupted power and lighting for their operations, contributing to the success of their project.

AUSTRALIAN RENTAL COMPANIES

PR Power has provided rental companies across Australia with **over 750 x LED lighting towers**. Our industry leading light towers ensured efficient and effective lighting solutions for their client's projects, PR Power is proud to support Australia's rental industry and does not rent to the end user.

MAJOR ROAD PROJECT

PR Power supplied **10 x Solar lighting towers** to a road project in Australia. Our zero emission solar lighting towers are popular on site and provided the necessary illumination required for night operations. All while reducing environmental impact and lowering costs, building towards a net zero future.

MELBOURNE CBD PROJECT

PR Power supplied **two 2250kVA diesel generators**, which were installed in a building in Melbourne's CBD. The generators serve as emergency backup power for the entire building, ensuring uninterrupted power supply during unexpected outages. With prime location in the city and accommodating for many businesses, reliable backup power is a critical requirement.

NASA - EPA

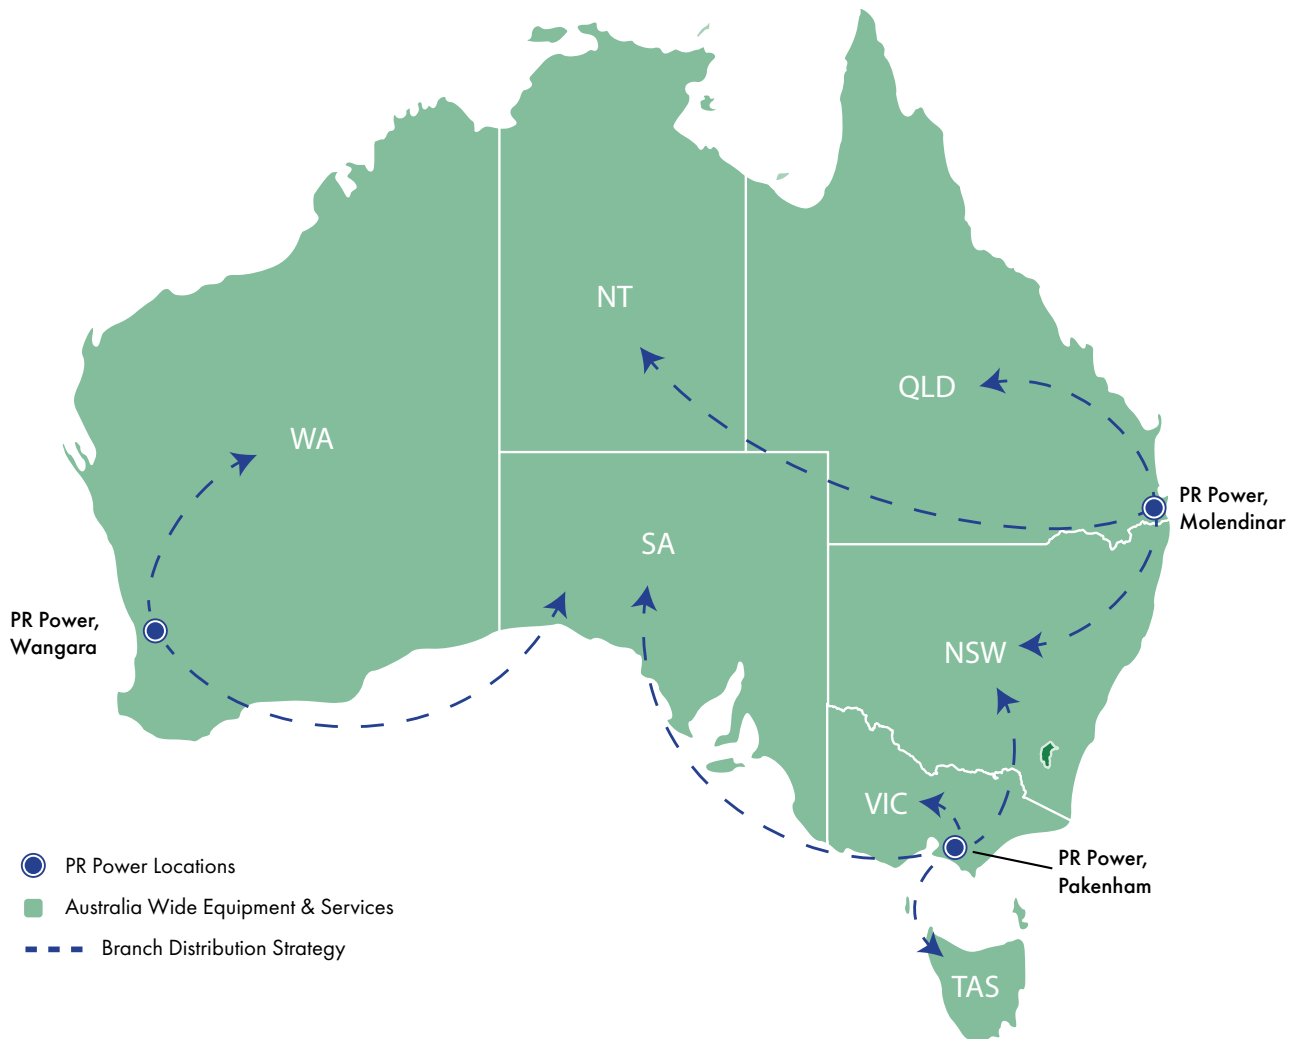

PR Power supplied EPA with **4 x Cummins powered 500 kVA Diesel Generators** powering Australia's first commercial space launch. The Diesel Generators evenly distributed the load between themselves. When the site isn't fully operational, the system migrates to a 2 x 110 kVA Generator set up. The reduced load is then managed between the two smaller generators.

OUR NETWORK

LOCATIONS & CONTACT

PR Power strategically has branches located in Western Australia, Victoria and Queensland to maintain a national presence, providing equipment, service and support, fulfilling our customer's needs Australia Wide.
