

Product Information Sheet

AES Bund Wall CP1220

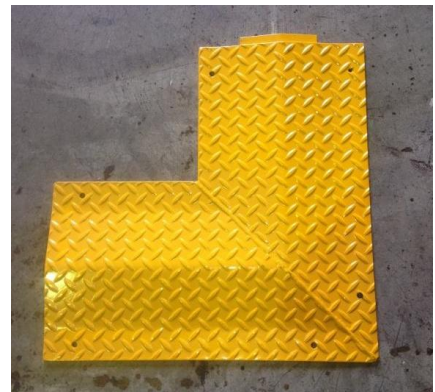

Absorb's AES Bund Wall CP1220 is made from steel chequer-plate, hot-dipped galvanized and powder-coated in a high visibility yellow finish so it is easily seen.

This sturdy, low profile bund wall, minimises forklift fouling while providing a safe and durable solution that secures D.G. liquids from the rest of your site. Meets AS1940-2012 specifications, and is perfect for regular forklift traffic.

The Absorb Bund Wall CP1220 is supplied in 1.2m length for easy handling and minimise transportation cost. Each length has six (6) pre-drilled anchoring holes. Also available in prefabricated 90° corners.
