SmartStix I/O

Terminal-block style I/O for Operator Control Stations (OCS)

Cost-effective option as expansion or remote I/O - connects to any OCS CsCAN network port

Local or Remote

Short-Circuit Protection (ESCP)

Removable Terminals

Compact, DIN-rail Mounted

Easily Expands I/O Capacity

Easy Setup

SMALL FOOTPRINT, POWERFUL EXPANDABILITY

SmartStix I/O is extremely compact, providing 16 and 32 point digital I/O in a package only 1.5″ (39mm) deep and a footprint of 2″H x 4.5″W (50 x 116mm) or 2″H x 7″W (50 x 177mm). With its small footprint, SmartStix I/O takes up very little panel space whether located in the main control panel or tucked away in a remote location. SmartStix I/O has a barrier style terminal strip and can be mounted on a DIN-rail.

SmartStix I/O expands the I/O capacity of any OCS utilizing the CsCAN network port available with every model. It offers fast response times without sacrificing robustness, with no need for a costly I/O interface unit. In addition to its peer-to-peer capabilities, CsCAN is used as a highly efficient method of distributing SmartStix I/O up to 6000 ft* away.

EASY TO SETUP - EASY TO CONFIGURE

Time and complexity to configure most remote I/O systems is a drawback. SmartStix I/O greatly reduces setup time. Just assign a unique ID to the I/O module using the integrated rotary switches, connect a 5-wire shielded cable, and configure the CsCAN I/O scanner in your Cscape control program.
