

COMPACT PRODUCT HIGHLIGHTS

1. Our Revolutionary Disinfecting Filtration System technology is effective at capturing 40x smaller size ultrafine particles than HEPA, efficiently removing 99.99% of particulates @ 0.007 microns.
2. Less dust and dander, pollen, dust mite waste, bacteria, mould, fungi, and virus protection.
3. 46m2 coverage perfect for homes and businesses.
4. Lightweight, ultra-sleek design & easy to maintain.
5. Place anywhere, with wall-mounted option

DESCRIPTION

The Intellipure Compact DFS Air Purifier is designed for home or small office use. It uses the same advanced, patented technology that makes Intellipure the world leader in indoor air quality. The simple, stylish design compliments any bedroom or small living space decor.

- Particle efficiency - 99.99% @ 0.007 microns.
- 6-stage VOC adsorption filter for heavy removal of harmful gases and odours.
- Patented DFS technology efficiently removes up to 99% of airborne mold, bacteria and viruses passing through the system.
- Each machine is independently tested and certified to guarantee better than HEPA efficiency.

FEATURES

Substantial reduction in airborne microorganisms, chemicals, offensive gases odors and smoke.

- Less dust and dander, pollen, dust mite waste, bacteria, mold, fungi and virus protection.
- Slim, compact, ultra slim design • Easy to maintain • A clean and fresh smelling environment.
- The revolutionary DFS technology reduces bioburden and inhibits microorganism growth passing into the system through Microbiostasis condition.
- Our technology is effective at capturing 40x smaller size ultrafine particles than HEPA, efficiently removing 99.99% of particulates @ 0.007 micron. Making Intellipure the most efficient air purifier available.
- Wall-mounted option.

APPLICATIONS

Industry-leading & built to serve.

The compact is perfect for homes, small offices, classrooms, and small conference rooms. Since the start of the coronavirus pandemic in February 2020, the Intellipure Compact has served in mission-critical settings. When it came to reopening in 2020, NYC Schools and Chicago Public Schools chose the Compact unit and DFS technology to provide clean air for students and teachers.

Specifications

Audio

Sound Power Level

Low: 40dB | Medium: 50dB | High: 60dB

Dimensions

Dimensions

L: 220mm, W: 330mm, H: 508mm

Weight

7.7kg

Functions And Features

VOC Adsorption Pre-Filter: Yes

DFS Main Filter: Yes

General

Life Expectancy

Pre-Filter: 6 months (Replace)

Main Filter: Every 12 months (Replace)

Operating Mode

Low, Medium, High, Turbo

Product Type Air Purifiers

Performance

Pollen - 246 m³/h (145 CFM)

Dust - 246 m³/h (145 CFM)

Smoke - 246 m³/h (145 CFM)

Filtration Efficiency: 99.99% of all airborne particles down to .007 μm

Operating Area

Up to 46 sqm

Power

Power Supply 220-240V, 50-60Hz

Rated Power

Low: 9W | Medium: 15W | High: 25W | Turbo: 65W

Warranty

5 Years Limited Manufacturer Warranty 5 Years on motor and blower.

1 Year on electronic components
