Premium Twin Filter System

Aqua One Australia is a premium system using one-micron pre filtration and sub micron carbon filtration. Producing fresh and great tasting water.

The AC400 Carbon series is manufactured in the USA and will remove chlorine, chloroform, ammonia, pesticides, herbicides, lead, copper, and other heavy metals this premium filter will also remove parasites like Cryptosporidium and Giardia Sydney's drinking water problem.

Plumbing Parts

It is legally required that a Pressure Limiting Valve be fitted. Brass Tee Piece, Isolation Valve tubing and connections will also be required.

Optional Extras

Cup holder for standard cooler

Cups (Box of 1,000)

Maintenance Option

This includes a full inspection of all equipment by a trained technician. Sanitation and sterilisation using non-toxic cleaners and a complete flush of all reservoirs every 6 months. Both cartridges on each unit will be changed at this time. Our computerised system ensures that your scheduled maintenance is done on time every time offering you peace of mind and no hassles. We keep signed and dated copies of maintenance reports should you ever need them.
