Portable Surface Roughness Tester SURFTEST SJ-210 Series

Catalog No.E4388-178

This is it! A small, lightweight, and extremely easy to use surface roughness measurement instrument that lets you view surface roughness waveforms right there on the color LCD screen.

Registered design in Japan, China, and the European Union.
 Design registration pending in the United States of America.

The Surftest SJ-210 is a user-friendly surface roughness measurement instrument designed as a handheld tool that can be carried with you and used on-site.

Easy to use

2.4-inch color graphic LCD with backlight

The color LCD provides excellent readability and an intuitive display that's easy to negotiate.

The LCD also includes a backlight for improved visibility in dark environments. **Simple key layout**

The Surftest SJ-210 can be operated easily using the keys on the front of the unit and under the sliding cover.

Highly functional

Advanced data storage capabilities

Up to 10 measurement conditions and one measured profile can be stored in the internal memory.

Optional memory card

An optional memory card can be used as an extended memory to store large quantities of measured profiles and conditions.

Password protection

Access to each feature can be password-protected, which prevents unintended operations and allows you to protect your settings.

Multilingual support

The display interface supports 16 languages, which can be freely switched. **Stylus alarm** (patent pending in Japan)

An alarm warns you when the cumulative measurement distance exceeds a preset limit.

Extensive analysis and display features

Complies with many industry standards

The Surftest SJ-210 complies with the following standards: JIS (JIS-B0601-2001, JIS-B0601-1994, JIS B0601-1982), VDA, ISO-1997, and ANSI.

Displays assessed profiles and graphical data

In addition to calculation results, the Surftest SJ-210 can display sectional calculation results and assessed profiles, load curves, and amplitude distribution curves.

Mitutoyo

Color graphic LCD

Intuitive display that's clear, sharp, and legible.

Large, 2.4-inch LCD

The large LCD provides excellent readability.

Backlight

The backlight improves visibility in dark environments.

Operation keys

- •The keys on the front of the unit and under the sliding cover are well-labeled and easy to use.
- •The user-friendly screen layout and arrow keys provide intuitive operability.
- Displayed settings can be changed easily by using the left and right arrow keys. (Patent pending in Japan.)
- Infrequently used keys are hidden under the sliding cover to prevent unintended operations.

Drive unit

The drive unit can be separated from the display unit by using a cable, allowing more flexible measurement. The driver can be separated and reattached in one simple step.

There are many different kinds of drivers and detectors available.

Applicable standards

Battery

Mitutoyo products.

The battery charges in one quarter the time of previous

In addition to JIS and ISO, the Surftest SJ-210 also complies with ANSI and VDA standards.

Multilingua

The display interface supports 16 languages.

High-speed USB communication

Data can be transferred to and from a computer via the high-speed USB interface.

Memory card support

The memory card slot lets you store large amounts of data onto a memory card.

Many features in a compact body

Extensive display features that assist measurement

The highly visible 2.4-inch color graphic LCD with backlight lets you see the screen easily even in dark environments.

 Pass/fail results are displayed in color.

Advanced data storage capabilities

- Up to 10 measurement conditions can be stored in the internal memory. Conditions can be quickly read according to the workpiece.
- An optional memory card can be used as an extended memory to store large quantities of measured profiles and conditions. *See page 10 for details about the memory card.

Storage Capacity

Data type	Internal memory	Memory Card (option)	
Measured profiles	1	10000	C THE
Calculation result	10	10000	10 -10
Measurement condition	10	500	CER

- Many interface options:
 A USB interface is
- equipped as standard. •The Surftest SJ-210 also provides an RS-232C output, Digimatic output, printer output, and footswitch input.

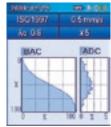

Advanced features

- The multilingual display interface supports 16 languages, which can be freely switched.
- Access to features can be password-protected.
- A quick-charge, long-life battery is provided.

 Assessed profiles, load curves, and amplitude distribution curves can be displayed in addition to calculation results. Assessed profiles can also be zoomed up and down.

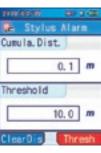

- The display mode can be freely switched between portrait and landscape.
- Calculation results are displayed in large characters.

Stylus alarm function

An alarm warns you when the cumulative measurement distance exceeds a preset limit. This feature can be used to prevent problems that would be caused by worn out styli. Any value can be specified as the limit. (Patent pending in Japan)

Easy setting

Displayed settings can be easily changed by pressing the left and right arrow keys under the sliding cover. For example, these keys can be used to switch the cut-off value (λc) and the number of sampling lengths (N) on the measurement screen.

measurement screen)

(Patent pending in Japan) (E

Setting parameters and recalculating results

The required parameters can be selected from the screen. The sub-menu also lets you specify detailed settings such as the tolerance. After completing measurement, the parameters can be changed and calculation can be executed again* using the new parameters.

*May not be possible, depending on the measurement conditions.

Detector / Drive Units

Battery-powered portability scores when making surface roughness measurements on the shop floor.

Capable of performing measurements in any orientation, including vertical and upside-down. Optional accessories, such as a height gage adapter, allow measurements to be performed efficiently in various situations and setups.

*Refer to pages 8 to 11 for details of the optional accessories available.

A wide variation in system setup is possible with the detector + drive unit + display unit combination.

Highly functional detectors and drive units

The driver can be separated from the display unit and reattached in one easy step.

[Storing drive unit in Display unit]

Detector supplied as standard

Selectable from the following two items.

Tip angle 90°

Measuring force: 0.75mN Stylus profile: Tip radius 2µm Tip angle 60° Measuring force: 4mN Stylus profile: Tip radius 5µm

Optional detectors

A wide range of optional detectors is available, including detectors for small holes, extra small holes, gear tooth surfaces, and deep grooves.

*See page 8 for details about the Detectors.

(Detaching drive unit from Display unit]

Drive units

Transverse tracing drive unit Retractable drive unit • Best suited for measurement of • The detector is in the retracted narrow, shrouded workpiece features such as crankshaft, EDM parts, etc. (Patent Registered in Japan) a blind hole etc.

Standard drive unit

• Popular standard drive unit

position at rest so it is immune from damage when inserted into a feature whose profile cannot be easily seen, such as

Carrying case

A convenient carrying case is supplied as standard for protecting the instrument in the field.

*1: Order the SJ-210 printer (No.178-421, optional accessory) separately. See page 10 for details about the SJ-210 printer.
*2: Standard deviation only can be selected in ANSI. 16% rule cannot be selected in VDA.
*3: Auto-sleep function is invalid when AC adaptor is used.

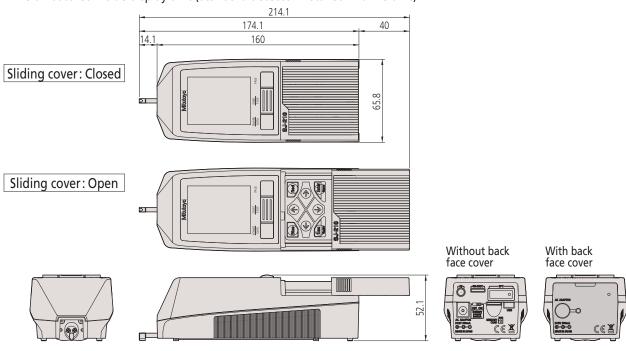

*4: For connecting the calculation display unit and drive unit.

To denote your AC line voltage add the following suffixes (e.g. 178-560-01A). A for 120V, C for 100V, D for 230V, E for 230V(for UK), DC for 220V(for China), K for 220V(for Korea)

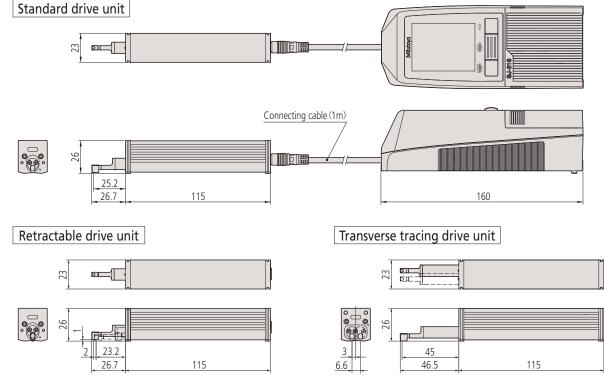

Dimensions: Display Unit and Drive Unit

Display unit, Drive unit

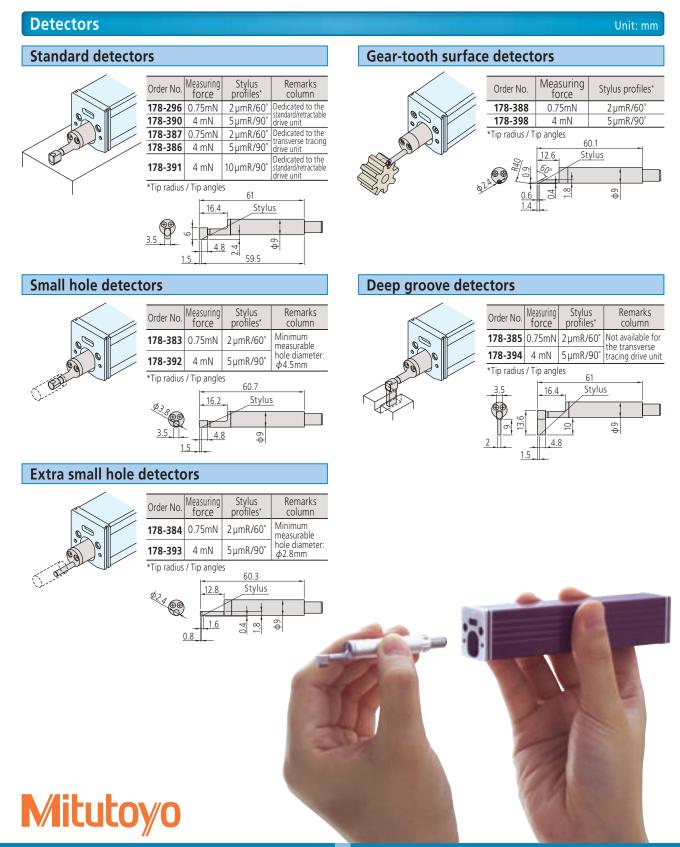

Drive unit stored inside display unit (Standard detector installed in drive unit)

Drive unit not stored inside display unit (Standard detector installed in drive unit)

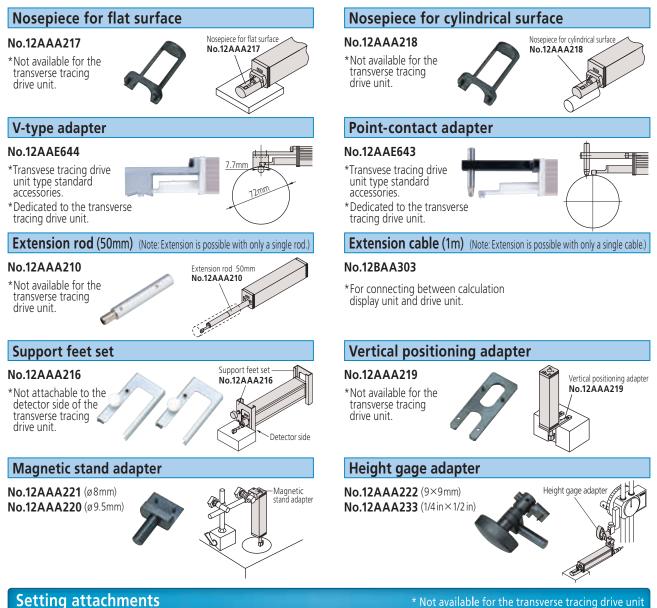

Dimensions: Detectors

Optional Accessories: For Drive Unit

Drive unit accessories

Setting attachments

Enhances measurement efficiency by facilitating the measurement setup of multiple workpieces of the same type and of the hard-to-access sections of a workpiece.

Setting attachment: V type for measuring in the cylinder axis direction

No.178-033

The V-width is adjustable to the cylinder diameter facilitating axial measurement of a wide range of cylinder diameters. • Adjustable range:

ø 5 ~ 150mm

Setting attachment: Magnetic slider type No.178-034

The magnet attached to the frame bottom surface allows taking hands-free measurement on the wall.

Setting attachment: Inside diameter type

No.178-035

Greatly facilitates measurement of internal wall surfaces of, for example, a cylinder block.

- Applicable diameter:
- ø 75 ~ ø 95mm Accessible depth: 30 ~ 135 mm

Optional Accessories: For External Equipment

Printer for SJ-210

Assessed profiles and calculation results and curves can be printed out by connecting the SJ-210-dedicated printer, which is palm sized ($W \times D \times H$: 93×125×70mm) and can run on an internal battery.

Power supply can be selected. (AC adapter or battery pack) Printable items: Measurement conditions, calculation results, assessed profile, bearing area curve (BAC), amplitude distribution curve (ADC), and environment settings.

Digimatic mini processor DP-1VR

By connecting this printer to the Surftest SJ-210's digimatic output, you can print calculation results, perform a variety of statistical analyses, draw a histogram or D chart, and also perform complicated operations for X-R control charts.

To denote your AC line voltage add the

following suffixes (e.g. 264-504-5A). 5A for 120V, 5D for 230V, 5E for 230V (for UK), 5DC for 220V (for China), 5K for 220V (for Korea), 5F for 230V (for Oceania)

SJ-210 \rightarrow DP-1VR Connecting cable 1m: No.936937 2m: No.965014

Memory card

A memory card for saving 500 measurement conditions, 1000 measured profiles, 500 display images, text file (measurement conditions, measured profiles, assessed profiles, BAC, ADC)

*Not all memory cards can be recognized. Please use the memory card recommended by Mitutoyo.

No.12AAL069

Unit configuration:

- ① Printer main unit
- ② Printer connecting cable
- ③ Printing paper 6-pack ④ Battery pack 1 piece
- (5) Exclusive use AC adaptor
- (with AC power cord) 1piece

No.178-421

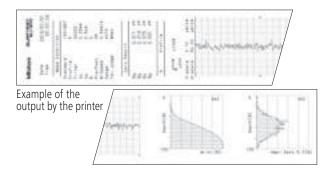

(e.g. 178-421A).

A for 120V, D for 230V

To denote your AC line voltage

add the following suffixes

Example of the connection with SJ-210

Printer for SJ-210 supplies Printing paper (5-pack) No.12AAA876

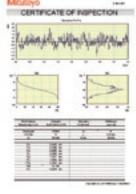

Optional Accessories: For External Output

Simplified communication program for SURFTEST SJ series

The Surftest SJ-210 has a USB interface, enabling data to be transferred to spreadsheet or other software. We also provide a program that lets you create inspection record tables using a Microsoft Excel* macro.

This program can be downloaded for free from the Mitutoyo website. http://www.mitutoyo.co.jp

Required environment*:

OS : Windows 2000 SP4 Windows XP Windows Vista Windows 7 Spreadsheet software: Microsoft Excel 2000 Microsoft Excel 2002 Microsoft Excel 2007

*Windows OS and Microsoft Excel are products of Microsoft Corporation.

 The optional USB cable is also required.
 USB cable for SJ-210 series (2m) No.12AAL068

Footswitch

A footswitch is used to trigger measurement. This tool is very useful in cases where you need to measure the same workpiece multiple times using jigs and other fixtures.

Protective sheets for the display

Protective sheet for the color LCD (5 sets)

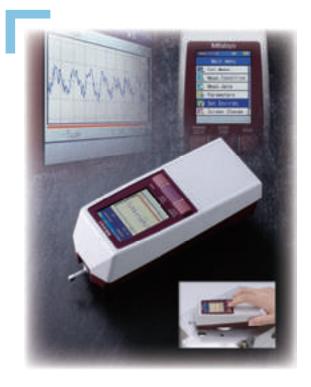

No.12AAL066

Input Tool: Calculation results input unit

Surftest SJ-210 calculation results can be loaded directly into commercial spreadsheet software via this unit simply by connecting it to the USB connector on a computer or a PS/2 type keyboard connector. (See Catalog No.E4250-264 for details.)

USB keyboard signal conversion model IT-012U No.264-012-10 PS/2 keyboard signal conversion model IT-005D No.264-005
