# FOILTECH
FT-12 / FT-12F

Perfect Solution for Short Runs
NO Dies Required
NO Make-Ready
NO Special Skills Required
Manual or Auto Feed Models
Designed for Digital Print

PERFECT SOLUTION FOR SHORT RUNS

The FoilTech FT-12F is the latest in the range of foil fusing machines from Seriously Digital. Foil Fusing is also known as Sleeking and Digital Foiling.

The FT-12 is available as a manual and automatic friction feed model incorporates a digital control panel for accurate setting of both temperature and speed, thereby ensuring that any repeat job can be simply and quickly re-established.

Operation is very easy!
Just print an image on your digital toner or Electroink based printing device, set the desired temperature and speed using the digital controls, start the machine running, engage the impression lever and begin to create inexpensive, foiled images that can command a high retail price in today's market place.
The machine will accept sheets up to 320mm wide and of any length.

SPECIFICATIONS

Maximum Paper Size	320 mm x 300 M
Minimum Paper Size	110 mm x 50 mm
Maximum Paper Thickness	400 gsm (0.5mm)
Feeding	Auto Friction Feed
Speed min	800 mm/min
Speed max	3250 mm/min
Physical Size L 670 mm / W 520 mm / H 220 mm	
Net Weight	26 kg
Power	240V 10A
