## Huntington's Chairs & Beds

Delivering the best quality and comfort in our tilt  
and lift chairs and electric beds in Australia.

*Authentic thinking, Empathetic living.*

# Huntington's Chair

Healthcare professionals and carers can have confidence in recommending Novacorr Huntington's furniture range.

Novacorr Huntington's furniture is specifically designed to alleviate discomfort and risk of injury which stem from muscle weakness, uncontrolled movement (Chorea), impaired cognitive function or breathing difficulties.

In developing our innovative range, we worked side by side with the Occupational Therapy team at Wesley Neurological Support Services in Melbourne, Australia to ensure our products would provide the ideal support for people caring for or living with motor dysfunction symptoms.

The Huntington's Chair sets the standard in safety, strength and durability in a stylish and innovative designed furniture piece. It offers specifically tailored structural, functional and practical design features in an everyday look and feel that clients love. It meets the needs of clients, carers and healthcare workers to provide support and reduce risk of injury.

Designed for vertical lifting, the chair enables carers to transfer clients or fit slings without the need to bend and the unique, electronically controlled positioning system prevents users from inadvertently sliding out of the chair.

## Features

The Huntington's Chair is available in over 50 colour choices providing the look and feel of an everyday chair in a heavy duty, anti-bacterial, waterproof and fire-retardant fabric. The chair covers can be wiped clean and removed for easy washing and infection control.

# Huntington's Bed

Our Novacorr team are passionate about working with clients and healthcare professionals to provide ideal healthcare solutions.

The Novacorr Huntington's Bed includes a unique, patented design which offers a fully adjustable hospital bed providing a safe and comfortable sleeping environment for people living with motor dysfunction symptoms. Manufactured for quality and longevity, the Novacorr Huntington's Bed uses quality Linak mechanical actuators that are tested and proven to handle the force of movement resulting from mild to advanced Chorea.

With an attractive and durable 'domestic look', this bed is uniquely designed to support both clients and carers alleviating symptomatic discomfort, breathing difficulties or uncontrolled movement. The positioning system and electrically controlled padded side rails are easily adjusted and features a hilo function using a simple handheld control that allows for clients to be cared for on the bed and easily and safely hoisted for transfer.

Ask about a free, no obligation trial of our products at home or in a clinic prior to purchase as well as 2 year warranty on the Huntington's furniture range. Designed specifically as an anti-entrapment, anti-injury bed, the Huntington's Bed offers standard choices of early and late stage versions.
