

Product Overview

We are excited to be adding yet another quality product to our range, which fits with our mission of helping you manage and reduce RISK onsite. It is essential that all cylinders are restrained and stored correctly to prevent accidents.

The MAXSafe Gas Cylinder Storage Cages are a cost effective way of providing a lockable enclosure for storing gas cylinders and fully complying with AS/NZS 1596 and AS4332.

There are 6 types available to cater for all circumstances, and are also suitable to be utilised for aerosol storage as well.

All cages come with relevant signage and magnetic door closures for safety.
