

AQ Medical 1000

VACCINE REFRIGERATORS

The AQ Medical refrigerator range are compact, robust and cost effective units, purpose-built for vaccine storage following the Australian Government Department of Health's 'Strive for 5' vaccine storage guidelines.

They are designed with low noise output and consistent temperature readings in mind, and maintain a stable temperature between the recommended +2°C to +8°C. AQ Medical units hold safety features such as visual and audible alarms in the event that temperatures fluctuate outside the set range.

All AQ Medical refrigerators are accredited by the Quality Care Pharmacy Program (QCPP), a quality assurance program that was developed by the Pharmacy Guild of Australia in consultation with the Pharmaceutical Society of Australia.

AQ Medical units are also backed by the extensive Avem Quirks service network. With qualified technicians and warehousing facilities across Australia, we can deliver responsive service and exceptional support on a national level.

AQ Medical vaccine refrigerators offers prime performance and quality at a highly competitive price.

AQ Medical 1000

VACCINE REFRIGERATORS

KEY FEATURES

- QCPP cold chain accredited
- Digital temperature control system preconfigured to hold temperature from +2°C to +8°C in line with 'Strive for 5' storage guidelines
- Lockable door
- Adjustable shelves
- Low energy consumption, low noise output
- Audible and visual auto resetting alarms
- Dedicated technical support line

OPTIONAL EXTRAS

- UPS & Battery Backup
- Controller Backup Battery (temperature logging)
- AQ Box cloud temperature monitoring system
- Comprehensive programmed maintenance

PRODUCT SPECIFICATIONS

Dimensions	Height 1998 mm Width 1200 mm Depth 697 mm
Gross Weight	190 kg
Gross Capacity	960 L
Temperature Range	+2°C to +8°C
Number of shelves	8
Power Consumption/24 hrs	22.47 kWh
Refrigerant	R290
Warranty (parts & labour)	24 months
