InShape™

InShape™ is a new generation of Electro Magnetic Muscle Stimulation for body shaping.

InShape™ applies super electric impulses generated by electromagnetic field to the muscle in order to induce forced muscular contractions. It is an automatic reaction which is equivalent to an intensive strength exercise such as 20,000 squats or sit-ups.

Treated muscles get remodeled and rehabilitated. It results in more toned and firmer muscle of **abs, arms, thighs and buttocks** for a better aesthetic appearance.

InShape™ is an effective non-invasive treatment without pain, and has no downtime or discomfort.

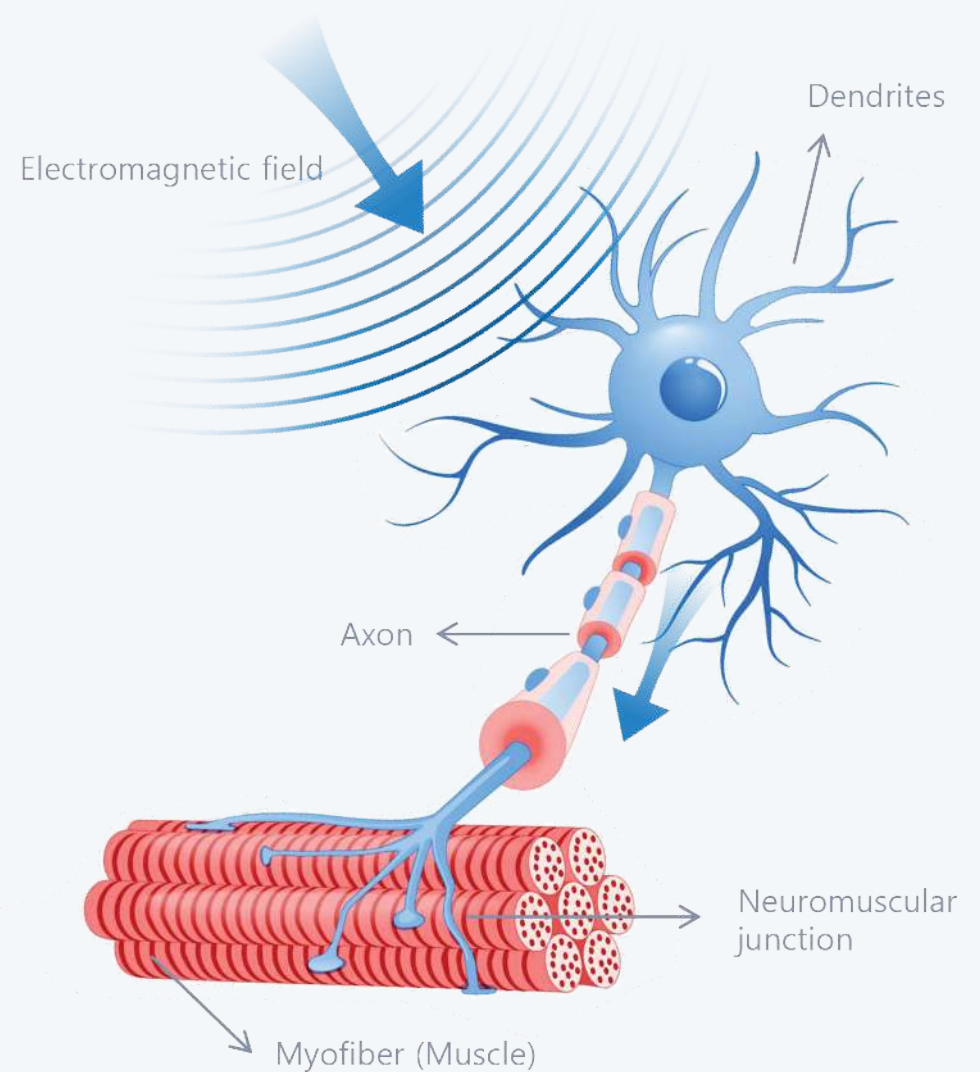

What is Electro Magnetic treatment?

The InShape™ is a device that delivers a stimulating pulse to your **muscles**. Many athletes seeking a competitive advantage use EMS to **build muscle** faster.

Since InShape™ **can** contract a **muscle** far longer than what an athlete **could do** themselves, it **can** grow more **muscle** and enhance training sessions.

Not only for athletes, the InShape™ will help you build muscle faster than any other technology.

Motor Neuron

How it Works ... *and it works!*

Clinical studies show that **Electro Magnetic Muscle Stimulation** is more **effective** than no exercise program. The InShape™ with the newest technology is capable of this and more. Helps pain relief, builds muscle much faster while burning fat and relaxing.

In more clinical studies subjects did these sessions three times per week for six weeks. After those six weeks, the researchers measured the subject's waist circumference, body mass index, subcutaneous fat mass (fat under the skin), and total body fat percentage.

Surprisingly, without modifying their exercise or diet, The InShape™ technology does indeed cause significant effects on decreasing waist circumference, abdominal obesity, subcutaneous fat mass and body fat percentage, leading the researchers to conclude: "The use of the high-frequency current therapy may be beneficial for reducing the levels of abdominal obesity in young women."

It is your body that fires your muscles by sending electrical impulses from your brain through your central nervous system (CNS). But the InShape™

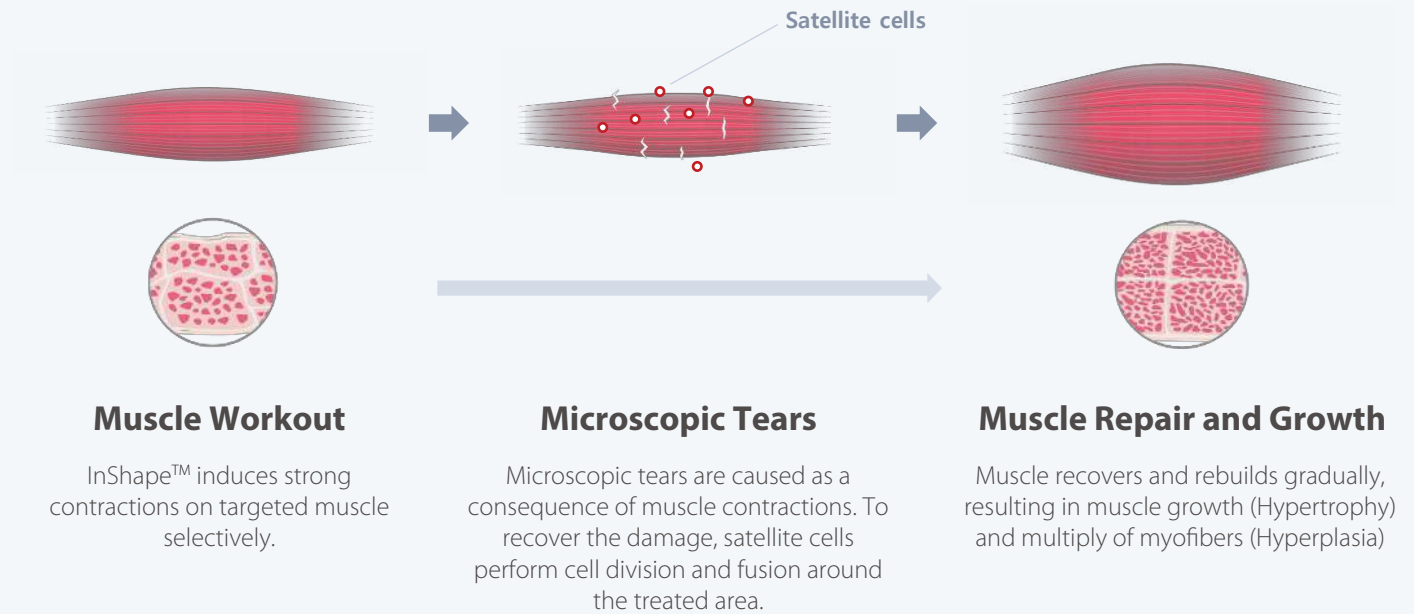

device allows you to engage in deep, intense, and complete muscular contractions without actually activating (or stressing) your CNS and not to mention your joints and tendons.

Impulses through the Inshape device stimulate the motor-neurons (nerves-to-muscles) in the legs and gluteal muscles (bum) telling them to contract repeatedly. (They relax or lengthen by themselves). This underlying technology, EMS has been around for many years but has not been sufficiently effective to induce cardiovascular/calorie burning until now!

Treatment Areas

For men and women

InShape™ Features | *The key for effective, safe body shaping*

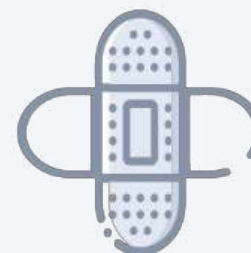

**Proven effect both
on muscle & fat**

Comfortable

Non-invasive

No downtime

**Treatment
ONLY in 30min**

Comparison Chart | *Why is InShape™ better?*

	InShape	Liposuction	Cryo-lipolysis
Effect	Muscle growth & Fat burning	Fat reduction only	Fat reduction only
Mechanism	Induced intensive muscle workout with Electromagnetic	Invasive extraction with needle	Fat freeze with low temperature
Whether surgical	Non-surgical	Surgical	Non-surgical
Treatment time	30min	60min ~	60min
Pain level	No pain	Pain by surgery	Pain by Cryo
Down time	No downtime	Weeks ~ Month	Days
Consumable	No consumable	Consumable needed	Consumable needed
Side effects	No damage on any tissue	Damage on superficial and inner skin	Bruise, Edema, Redness

After 3 week treatment | Muscle strength & toning, fat burning, improvement of skin elasticity

BEFORE

AFTER | 6TH TREATMENT

After weeks | Muscle strength & toning, fat burning

BEFORE

AFTER | 5TH TREATMENT

After 2 week treatment | Muscle toning & firming, improvement of skin elasticity & aesthetic appearance

AFTER | 6TH TREATMENT

Frequently Asked Questions

How long does the treatment take?

20 to 30 minutes

How often do I have a treatment?

You will receive a treatment plan. Your treatments will be scheduled 2-3 days apart. You may do up to 6 treatments in your treatment plan.

Is there a limit of the number of sessions?

Up to 6 sessions, maximum 2-3 sessions a week.

What areas can I get treated?

legs, arms, abdomen, back glutes

How long until I see results?

It is possible to see results immediately after your first session. The Inshape results continue to work 2 to 4 weeks after treatment.

How long do the results last?

After 1 complete session (4-6 treatments) results last 3-6 months (Individual results vary, based on age, gender, muscle mass, fat thickness etc.)

What does the treatment feel like? Is it painful?

Creates automatic muscle movement resulting in a pain free treatment

Are there side effects?

It may create natural workout soreness.

Is there downtime?

No downtime

Who can have this treatment?

Men and women

“Quality in a product is not only what you put into it.
It is what the customer gets out of it.”

~ Soma Lasers Australia

Unmatched, incomparable device made with the therapist in mind

Soma devices are made with the highest quality engineering working together with Germany, Korea, Japan the USA and proudly designed in Australia for fantastic durability.

Warranty

We back up our promise at Soma Lasers Australia, with a 2 year warranty on all our new medical aesthetic devices.

InShape™ Specifications

Model	INS-100
Product Type	Electromagnetic System
Shape of Stimulation Pulse	Biphase
Pulse Duration	300 μ s
Magnetic Power	0-7 Tesla
Dimensions (W x D x H)	460 x 590 x 1280 (mm)
Power input	230 V, 50-60 Hz
Power Consumption	2.3kVA
Weight	66kg

* All specifications are subject to change without notice

* Please read precaution and instructions before use
