

The EverFlo

Oxygen delivery has been simplified with the Everflo oxygen concentrator. The smaller, lighter EverFlo oxygen concentrator from Philips Respironics is making a big impression on providers and patients. Its sleek, ergonomic design makes EverFlo easier to store, move, and carry than conventional concentrators, and it is one of the quietest and most energy efficient devices available today. With no filter for patients to maintain, a durable metal oxygen outlet, and fewer moving parts than other concentrators, EverFlo is designed to deliver consistent, trouble-free operation.

The EverFlo has a Moulded handle that is easy to pick up and transport with one or both hands. There is an optional Humidifier bottle holder compatible with all bottle styles. The internal tubing storage keeps tubing conveniently available for use.

The EverFlo is able to deliver from 0 – 5 LPM and can run almost continuously through day and night. It has a Recessed flow meter, reduces the risk of breakage and makes dialling up the oxygen level you need very easy. The Interface panel has an on/off switch and alarm indicators.
