

in-ground socket

- Full stainless steel
- Auto shut lid to prevent tripping
- Suits most umbrella poles
- Removable top plate

on workmanship & materials

Secure your assets

In-Ground Sockets are devices which secure Commercial Market Umbrellas and many other products to the ground.

No matter how strong or well designed an umbrella is, if it's not properly secured it is a safety hazard.

Replaceable Top Lid

Awnet have created a multipurpose range of in-ground sockets for umbrellas, barriers, clear drop blinds and more.

In the event of vandalism the removable top plate allows for easy replacement without having to remove and re-core the entire socket.

Please contact Awnet for further details and ordering.
