Our mission

Our mission is to create a better healthcare environment for patients, young and old; and to change the way people perceive and experience healing. Virtual Environments is dedicated to achieving this with our range of Virtual Environment products.

Virtual Environments *Elements*

Featuring innovative elements such as our Vista Coat Wall Wraps, Scanner Skins, Virtual View Skylights and Windows and Mood Lighting our Virtual Environments Elements range enhance your healthcare setting, create immersion, and reduce patient anxiety. Designed specifically for your space and demographics, these static elements bring a personalised touch to your health service, making them more welcoming and comforting for patients.

Virtual Environments *Cinema*

An advanced integrated technology based offering, Virtual Environments Cinema brings together a suite of audio/visual providing an immersive experience for the patient. Patients may choose their preferred environment using the patient centric control tablet, and go on a journey with the chosen environment replicated across compatible displays and optimised/targeted projection with spatialial colour matched mood lighting.

Virtual**Environments**

Vista Coat

Transform the space away from the clinical setting.

Wall Wraps come in a range of playful or relaxing themes to suit your environment. Printed graphics onto a high-quality vinyl and adhered to your walls like wallpaper this product will stand the test of time and offer you a vibrant wall covering for years to come.

Wall Wraps are one of our most versatile options and can be installed just about anywhere you can imagine. In a very short period of time any space can be transformed from an empty dull environment into a completely new world. From eye-popping visual feasts that excite the eyes to calm, relaxing or inviting ambient vibes, whatever environment you want to build, Virtual Environments is their to help you.

Virtual View

Bring life and energy into your practice.

Virtual Skylight provide a realistic window in the ceiling that allows patients who are laying on an imaging table to gaze into. Displaying anything imaginable; clouds, a thought-inspiring night sky, or a beautiful jungle canopy. These virtual openings are often the centre piece of an integrated solution but can equally work in isolation to transform any dull or sterile room into something warm and welcoming.

The size, shape, and image can be custom tailored to your every need. Whether you want a square, circle, or a more complicated shape, Virtual Environments can design a solution to fulfil your requirements. Take advantage of our extensive library of stunning photographs, or seek the guidance of our talented in-house creative team to convert your vision into a reality. Alternatively, we can use photos or images that you provide for an extra personal touch.

Mood Lighting

The finishing touch.

Using a combination of LED strip lights and LED down lights, Virtual Environments is able to greatly enhance the look and feel of any room.

Using the remote control to adjust the lighting, you are able to set any desired colour to suit the room's theme or even the patients favourite colour. This makes for a much more engaging experience that will help soothe the mind of anyone in the room.

Scanner Skin

Give personality to your modality.

Medical equipment is designed to be functional, and as a result, not very inviting. Scanner Skins make your medical equipment, such as imaging devices, a more welcoming and enjoyable experience for your patients. Scanner Skins are made from a highly conformable vinyl material. This vinyl is high-quality and coated to prolong its life making it easier to clean.

Imaging Solutions has experience applying wraps to a range of different devices, from MRI and CT scanners, to ceiling suspension systems, mobile x-ray equipment, or even patient beds.

VistaCoat®

Wall mural wraps and floor coverings come in a range of playful or relaxing themes to suit your environment. Printed graphics onto a high-quality vinyl and adhered to your walls like wallpaper this product will stand the test of time and offer you a vibrant wall covering for years to come.

Wall Murals and Wallpaper

Wall Wraps come in a range of playful or relaxing themes to suit your environment. Printed graphics onto a high-quality vinyl and adhered to your walls like wallpaper this product will stand the test of time and offer you a vibrant wall covering for years to come.

Wall Wraps are one of our most versatile options and can be installed just about anywhere you can imagine. In a very short period of time any space can be transformed from an empty dull environment into a completely new world. From eye-popping visual feasts that excite the eyes to calm, relaxing or inviting ambient vibes, whatever environment you want to build, Virtual Environments is their to help you.

Choose from one of our photographs, supply your own or have our in-house photography team go on a field trip to an iconic location or scene from your city or favorite place to use.

VISTAcoat

Floor Coverings and Decals

Using Floor Wraps in your practice will enhance any room and create a positive experience for you and your patients. These wraps are made with durable materials that can withstand sanitary cleaning and also remain tread resistant.

Floor Wraps can display illustrations, photographs or any kind of custom artwork you can imagine.

Queensland Diagnostic Imaging

Perth Children's Hospital

Queensland Children's Hospital

Perth Children's Hospital

National Capital Diagnostic Imaging

Perth Children's Hospital

Paediatric patient distraction.

Going to hospital and undergoing imaging procedures can be a very harrowing and scary experience for any patient. For paediatric patients, the level of anxiety can be even greater as they do not have the years of knowledge and experience that can help some adult patients. The machine makes strange noises and looks alien. The room looks stark and sterile. And the smell of hospital disinfectant pervades. They may also be feeling unwell and have worried parents with them. Getting them to go into a scanner and, once in, to relax, stay still, and follow the technologist directions can often be challenges that are insurmountable. This can result in sedation of the patient.

Imaging Solutions has developed a set of themes designed specifically with children in mind. They are both relaxing and playful and are suitable for a wide range of age groups. All our creative work is done internally which gives you the greatest flexibility. We can easily modify one of our existing themes to suit your room or corporate colour scheme. Or we can develop something truly unique from scratch just for you.

Crafted with the beauty of nature.

Nature provides us with beautiful scenes of lush green hills, colourful rain forests and awe-inspiring landscapes. Positive emotion plays an important role in healing and nature has a universal affect on us all. That is why our goal is to capture the best parts of what nature has to offer and provide them to you and your patients in unique and innovative ways.

Our range of natural themes come from all around the world, from our partners and our own in-house photographers. A common request is to capture a local landmark and display that on stunning printed Wall Wraps within a scan room. Our photographers are ready to turn your imagination into reality.

Westmead Children's Hospital

Scanner Skin®

Convert your clinical, stark looking medical equipment into works of art. Scanner Skin is a conformable self-adhesive vinyl that is coated to ensure longevity and a cleanable surface. Brighten your procedure rooms with Scanner Skin.

Medical equipment is designed to be functional, and as a result, not very inviting. Scanner Skins make your medical equipment, such as imaging devices, a more welcoming and enjoyable experience for your patients. Scanner Skins are made from a highly conformable vinyl material. This vinyl is high-quality and coated to prolong its life making it easier to clean.

Imaging Solutions has experience applying wraps to a range of different devices, from MRI and CT scanners, to ceiling suspension systems, mobile x-ray equipment, or even patient beds.

Mood Lighting®

Mood Lighting is a versatile and effortless way to enhance any space, providing a calming and immersive atmosphere with fully customisable colour options. Designed for patient-centered environments, it allows users to create the perfect ambiance to suit any setting.

Easily controlled via a wall-mounted panel or remote, Mood Lighting offers a wide spectrum of colours, adjustable brightness levels, and dynamic sequences to match specific needs. Whether setting a warm, soothing glow for relaxation or introducing vibrant hues for a more stimulating environment, this system ensures flexibility and ease of use.

Ideal for treatment rooms, waiting areas and therapy spaces, Mood Lighting transforms sterile environments into welcoming, patient-friendly spaces. With seamless installation and intuitive controls, it provides an instant and effective way to enhance comfort and well-being at the touch of a button.

VirtualView®

Virtual View is the ultimate tool at creating a friendly and welcoming environment. Virtual View gives you the option to bring the great outdoors, indoors. Using specialised imagery we're able to emulate the view of a real skylight or window. Virtual View is useful in many environments, from healthcare to home.

VIRTUALview

Skylights

Bring life and energy into your practice.

Virtual Skylights provide a realistic window in the ceiling that allows patients who are laying on an imaging table to gaze into. Displaying anything imaginable; clouds, a thought-inspiring night sky, or a beautiful jungle canopy. These virtual openings are often the centre piece of an integrated solution but can equally work in isolation to transform any dull or sterile room into something warm and welcoming.

The size, shape, and image can be custom tailored to your every need. Whether you want a square, circle, or a more complicated shape, Virtual Environments can design a solution to fulfil your requirements. Take advantage of our extensive library of stunning photographs, or seek the guidance of our talented in-house creative team to convert your vision into a reality. Alternatively, we can use photos or images that you provide for an extra personal touch.

Virtual Skylights In Use

Virtual Skylights can enhance the visual appeal of any room. With plenty of photos to choose from and the ability to tailor design something special for you, the possibilities are endless.

Here are some examples of how Virtual Skylights can completely change the look of a medical imaging room and make them a captivating experience for the patient.

Windows

A window to another world.

Virtual Windows are simulated viewers into other worlds. Relaxing beaches, Blissful forests, and Vast galaxies are just a few of the endless possible designs available for your medical practice.

Like Virtual Skylights, they are great for promoting a relaxing environment for patients and staff. These virtual openings are ideal for complementing a Virtual Skylight or they can also be used to enhance a space on their own.

Prefabricated Configurations

Virtual View systems are available in almost unlimited layouts consisting of prefabricated 1195x595mm panels, the most popular size compatible with standard T-bar ceilings or our prefabricated framing systems.

1.8m x 1.2m

1.8m x 2.4m

1.2m x 2.4m

3.6m x 1.8m

Customised Configurations

Depending on our specific project or design directly, Virtual View systems can be configured to almost any shape or size, from large single panels spanning approximately 1500 x 3000mm to circular layouts.

Custom

Cinema Control

Cinema Control is the central hub of the Virtual Environments Cinema range, integrating Cinema View, Cinema Skin, and Cinema Lighting into a seamless experience. Its intuitive tablet interface allows operators to adjust visuals, colours, and content effortlessly. Wirelessly connected to a hardwired control system, it ensures smooth operation, transforming clinical spaces into immersive, patient-centered environments.

Cinema View

Cinema View enhances patient comfort with immersive projections controlled via Cinema Control. Skylight projects calming visuals onto the ceiling, ideal for procedures where patients lie on their backs. Window creates a virtual window, displaying natural or scenic views to reduce feelings of confinement. Both use discreet, high-quality projection units to enhance relaxation without disrupting workflows.

Cinema Skin

Cinema Skin uses dynamic projection technology to display videos and animations directly onto a scanner's gantry. Designed for a seamless, immersive experience, it prevents light spill and adapts precisely to each scanner's contours. Boundary mapping keeps projections confined, ensuring a distraction-free, customisable visual environment that enhances patient engagement.

Cinema Lighting

Cinema Lighting synchronises ambient lighting with Cinema View and Cinema Skin, adjusting in real time to match projected visuals. This seamless integration deepens immersion, enhances relaxation, and transforms clinical spaces into more engaging, patient-friendly environments.

Cinema Display

Cinema Display is a high-definition, patient-centered entertainment system designed to enhance comfort during medical procedures. With a sleek, 32" HD LED monitor, it offers a superior alternative to projectors or goggles, delivering clear, engaging visuals without interfering with clinical workflows.

Cinema Control

Cinema Control is the central hub of the Virtual Environments Cinema range, seamlessly integrating Cinema View, Cinema Skin, and Cinema Lighting into a unified experience. Featuring an intuitive, user-friendly tablet interface, Cinema Control allows operators to adjust visuals, from preset media and solid colours to fully customisable content. The tablet can be secured on a desk, wall-mounted outside the procedure room, or placed in the control room for easy access. Wirelessly communicating with a hardwired control system located out of the way in the equipment or control room, Cinema Control ensures effortless operation, transforming clinical spaces into immersive, patient-centered environments.

Cinema View

Simulate the world around you.

Utilising the Virtual Environment Cinema Control and projection, the Cinema View series seamlessly integrates into any clinical environment, transforming enclosed spaces into immersive, calming experiences.

Skylight

Designed for procedures where patients lie on their backs, Cinema View Skylight projects dynamic, soothing visuals onto the ceiling, creating an immersive and comforting atmosphere. Whether displaying calming skies, serene nature scenes, or fully customisable visuals, it helps patients stay still and relaxed, reducing anxiety and enhancing their overall experience. The projection unit is discreetly mounted and features an ultra-short-throw lens to ensure a high-quality image without interfering with storage space or procedural workflows.

Window

Cinema View Window brings the illusion of natural scenery into enclosed clinical spaces, creating a virtual window on any wall. Whether simulating a peaceful garden, ocean waves, a bustling cityscape, or other customisable visuals, it helps reduce feelings of confinement and provides a comforting focal point for patients during procedures.

The projection unit is discreetly ceiling-mounted, using a typical projector to deliver a crisp, high-quality image while maintaining an unobstructed workspace.

Cinema Skin

Add a new dimension to patient relaxation.

Cinema Skin projects videos and animations, through proprietary software, onto the gantry of a scanner. Visually stunning, Cinema Skins are 'cut' to fit the equipment so there is no bleed into other surfaces or into the patients eyes. The projection is controlled through a web-based interface that is accessed on a computer in the control room and can be changed to suit the patient.

This means that the operator can change from animations to scenes of nature, or the patient can even watch their favourite movie. In a paediatric facility that looks after infants through to 18 year olds, Cinema Skin gives the greatest possible flexibility in matching the Virtual Environment to the patient.

Cinema Lighting

Transforming Spaces, Enhancing Experiences.

Cinema Lighting enhances immersive and dynamic environments by synchronizing ambient lighting with the visuals projected by Cinema View or Cinema Skin. Using a spatial algorithm, Cinema Control analyzes the base colours of the visual media in real time and dynamically adjusts the lighting to match. This seamless integration ensures that the surrounding space evolves with the content being displayed, deepening the sense of immersion and creating a more calming and engaging experience for patients.

Cinema Display

Optimised Comfort, Enhanced Workflow.

Cinema Display transforms patient experiences by delivering high-quality visuals through a 32" HD LED monitor, seamlessly integrating into clinical environments. Designed to reduce anxiety, increase patient cooperation, and minimise the need for sedation, it serves as an engaging distraction during procedures where stillness is required.

Unlike conventional projectors or goggle-based systems, Cinema Display offers a clear, high-definition viewing experience with superior image quality. Its lightweight, height-adjustable mobile stand allows for easy repositioning anywhere in the examination room, while an optional wall-mount ensures a more permanent solution. The system supports a variety of media formats, enabling facilities to customise content based on patient preferences.

Virtual Environments Cinema for MRI

Virtual Environment's Cinema was designed with MRI in mind, leveraging Cinema Control technology to seamlessly integrate MRI-compatible versions of Cinema View, Cinema Skin, and Cinema Lighting, enhancing patient comfort and reducing anxiety during scans.

With Cinema Control for MRI, the system creates a fully immersive and soothing atmosphere, promoting relaxation and stillness to help minimise sedation rates and improve scan efficiency.

See our *MRI Equipment and Accessories* catalogue for our range of MRI Cinema Solutions.

Explore Our Range

At Imaging Solutions, we take pride in offering an extensive and comprehensive range of products designed to cater to the diverse needs of healthcare facilities across the globe. Our commitment to providing top-quality equipment and technology solutions is at the core of our Preferred Supplier Agreement. This ensures that our customers receive unparalleled access to the best in class products, while benefiting from the tangible value we deliver through managing and containing operational costs. With a broad spectrum of offerings, our Single Source Supply agreements are the ideal solution for meeting your facility's specific needs.

As your trusted partner, Imaging Solutions is dedicated to providing a seamless and integrated experience, allowing you to focus on delivering exceptional patient care. With our Preferred Supplier Agreement, you can have confidence that you are investing in the most advanced and reliable products in the industry, all while enjoying the cost-saving benefits that our Single Source Supply agreements provide. Explore Our Range and discover the Imaging Solutions difference.

Your Single Source Supplier™

Established initially as a small medical imaging hardcopy film and consumables distributor, specialising in analogue based imaging technology, the company very quickly identified the need for a reliable supply source of high quality imaging accessories. As a result, the business targeted a niche of premium suppliers of imaging accessories and over a short space of time acquired distribution access to develop an initial foundation for today's expansive and comprehensive accessories portfolio. These industry wide market leading brands converge to develop a comprehensive product portfolio offering the company markets today.

Effectively on completion of our initial growth phase, in building the accessories range offering, Imaging Solution set about the task of identifying the world's market leading brand, in every functional specialisation existing in the imaging market.
