

Pallet Leveller- Spring Activated / Standard

Pallet Levellers have a top deck and a base connected by a pair of scissor legs. The leveling mechanism is a set of springs set to the weight and height (the density) of the product. Pallet levellers work automatically and raise or lower as the weight changes. Load setting is a simple process and for most users springs never have to be changed.

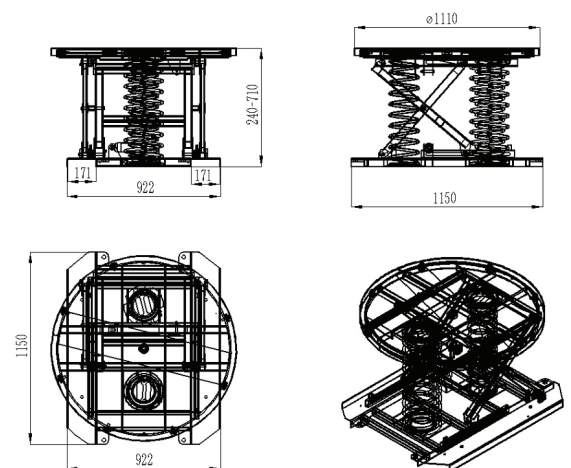

Features

- Easy to move with a forklift.
- A shock absorber prevents any bounce.
- Open top, now features a perspex top for safety.
- Dramatically reduces the effort required to palletise goods.
- Built-in turntable allows simple load rotation and access to all sides.
- Powder coated safety yellow for hi visibility and extra protection from wear and tear.
- Comes with 3 springs, the springs a chosen to match the weight and height of a fully load pallet.
- Durable and tough, this pallet leveller can be used in a wide range of applications including warehousing.
- Automatically keeps pallet or stillage loads at an optimum working height when loading or unloading goods.

Specifications

Model		SPP360-2000
Capacity	(kg)	2000
Min Table Height	(mm)	240
Max Table Height	(mm)	710
Base Size	(mm)	L1150xW922
Platform Diameter	(mm)	1110
Fork Pocket Dimensions WxH	(mm)	171x50
Net Weight	(kg)	128
