ALTIS Video Laryngoscope

High-performance

video laryngoscopy with
reusable imaging and
single-use blades

- **10cm high-resolution touchscreen** for clear airway visualisation.
- **720p HD camera** with video recording and still image capture.
- **Single-use disposable blades** help simplify blade turnover between procedures.
- **Reusable integrated device** supports a practical, cost effective disposable-blade model.

Revolutionising Airway Technology

LATERAL
MEDICAL

A system that ensures **infection control benefits** of single-use components **without** the ongoing **expense** of fully disposable systems!

ALTIS VIDEO LARYNGOSCOPE

- 10cm touchscreen
- 720 x 720 display resolution
- 1280 x 720 pixal, 720p HD camera
- Centrally positioned display
