Plasson Polymatic Plus

PLAEF630

16–800mm Electrofusion control box

The Polymatic Plus is a **universal electrofusion machine**, suitable for welding pressure pipe and fittings for the transport of gas, water, fire systems, and all other pressure systems using PE100/PE80, PP and PP-R electrofusion couplings.

PLASSON

- ✓ Working range 16 to 800 (additional machine cooling time required for fittings over 630mm)
- ✓ Weld Parameter Entry: Pen Barcode Scanner, SmartFuse or Manual
- ✓ Terminals: 4.0mm (includes 4.0 to 4.7mm adaptors)
- ✓ Data Recording: USB (approx. 1000 records)
- ✓ Heavy duty carry case
- ✓ Dimensions: 440 x 380 x 320mm
- ✓ Weight: 20kg
- ✓ Output voltage: 8 – 48V

A standard service includes:

- Recalibration
- Installation of latest software
- Inspection and testing of all components
- Calibration certificate
