

Engineered for performance

Memaplex™ advanced strength polymer ○
created from an exclusive composition of the most sophisticated polyolefins and rubber additives, expertly blended for unequalled strength and flexibility.

Unrivalled recovery ○
through a unique built-in memory that allows the barrier to flex, cushion and reform repeatedly upon impact, saving vast amounts in barrier and vehicle repairs.

Huge return on investment ○
from incident prevention and downtime avoidance as rails, vehicles, floors and infrastructure do not need replacing or repair.

Self coloured and UV stabilised ○
for continued high visibility and long lasting aesthetics with no repainting.

Ultra-low maintenance ○
material is chemical and water resistant, non-corrosive, non-scratch and self coloured so no repainting, rusting, flaking or corrosion.

Energy absorption system ○
dissipates impact forces through the barrier and away from floors and fixings, preventing costly damage.

Hygiene seals ○
remove ingress points.

Multi-directional system ○
ensures a streamlined fit around any column shape and any column location.

Zinc nickel, electrophoretic coating ○
on base plates as standard, provides advanced protection against corrosion damage.
