

## Bariatric Chair

Delivering the best quality and comfort in our tilt and lift chairs and electric beds in Australia.

*Authentic thinking, Empathetic living.*

# Bariatric Chair

Novacorr Healthcare have created a practical and beautifully designed range of custom lift chairs to ease the challenges faced by people living with a disability or simply a reduction in their mobility.

The Novacorr Bariatric Chair is one of our flagship designs, providing an investment in comfort, improved health and peace of mind. Our chairs are custom designed to suit the needs of every customer.

Bariatric Chairs contribute to improved health and general wellbeing by improving circulation, reducing risk of shoulder strain or hip displacement, providing less pressure on joints and even pressure distribution.

Novacorr consultants are friendly and extremely knowledgeable. They work closely with clients and healthcare professionals to complete a careful medical script that identifies specific health needs, measurements and physical requirements that influence the chair design. As we continue to tell our clients, "One size doesn't fit all".

Our unique design allows for maximum comfort and for users to remain in a seated position as they recline (tilt-in-space). If you or your loved one suffers from Lymphedema or Cellulitis, elevating the feet parallel to the heart helps to reduce fluid retention in the legs, ankles and feet. In the recline position, the chair offers a break at the knees to provide additional support and to improve movement and stability.

Novacorr Bariatric Chairs are strong, durable and manufactured to last using the highest quality components and materials, including marine and form ply from the building industry.

# Features

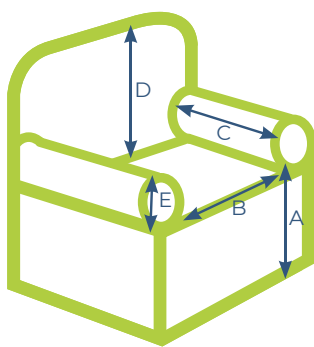

- Chair frames constructed from marine and structural ply woods
- Best quality Phoenix mechano actuators
- Dunlop commercial grade endurance and memory foams
- Commercial grade chair webbing
- Commercial grade Dacron and poly-fibre for extra comfort in back rest
- Second motor option to enable altering of back position without moving legs
- Removable arm covers, neck cushion and seat overlays
- Side pockets for storage
- Unique reinforced steel mechanism
- Weight tested to 450kg

# Standard Choices

- Choice of premium designed fabrics (Warwick or Profile)
- Foam seating in soft, medium or firm
- Pressure care foams and gels
- Hand control (wired/wireless)
- Lifting ability (tilt, tilt & lift and lift options)
- Chair arm size and width (skinny, standard or chubby)

# Made to Measure

The Bariatric Chair is made for a 'perfect fit' and is available in five, weight tested sizes. Please supply us with the required following measurements from a seated position:

- A. Floor to Seat**  
(inside knee to base of heel)
- B. Seat Width**  
(outside left leg to outside right leg)
- C. Seat Depth**  
(from inside knee to tailbone)
- D. Back Height**  
(tailbone to mid ear)
- E. Arm Height**  
(seat to top of arm rest)
