Rotor

Classifier Screen

Pushing Box

Driving System

Bearing

Hydraulic Power Unit

Pre-press (Optional)

Electric Control Panel

After the material enters the equipment through the hopper, the pushing box (3) drives the material to the knife rotor (1) driven by the hydraulic Power unit. Knife rotor driven by driving system to shred materials. The shreds are discharged through the screen (2), and the size of shreds is subject to the screen mesh size. The movable knife (A) is fixed on the knife roll (B) by the bolt. When the equipment is running, the material is shredded by the interaction between the movable and fixed knife (C); Adjust the bolt (D) to change the distance between movable and fixed knives.
