Power

Alma **Opus**

Alma's dedicated RF Platform

Featuring Opus Plasma™ technology, Opus™ addresses a variety of textural and skin quality concerns - from minor to complex - so you can enjoy greater flexibility and convenience as you treat numerous indications, with impressive results.

Trusted **Technology**

Revolutionary **Results**

Boosted **Business**

Better for your patients
Better for your practice

1. Customizable

By adjusting the intensity of power, depth and plasma - skin rejuvenation treatments can be customized - from mainly ablative to mainly thermal - according to the patient's needs.

2. Safe & Effective

A single solution that is safe and effective for all skin types - including the delicate areas of the face, neck, and décolleté, and skin that has thinned due to ageing.

Alma **Opus**

2 Core Treatments

Skin Resurfacing

Transformative results for textural concerns, scarring and uneven skin tone.

2 Leading Technologies

Opus Plasma

Unique patented fractional RF technology provides skin resurfacing treatment by both ablating and heating the skin, treating the affected area while leaving surrounding healthy tissue intact, and providing control based on the desired ablation effect.

Radio Frequency

The unique 40.68MHz frequency of our proprietary **AlmaWave** technology facilitates deep, homogenous heating, created by dielectric heating that stimulates the formation of new collagen.
