MEDIGUARD

Mediguard Incubators are perfect for use in Hospitals, Laboratories, Research Facilities and more. With a temperature range of 0°C to 65°C, an easy to use LCD Display and a glass panel on the door making it easy to see samples, this is the perfect incubator for any application.

Single LCD Display

High Accuracy single LCD Display

Glass Panel Door

Makes it easy to see stock levels

Temperature Control

Temperature fluctuation of ±1℃

The temperature in Mediguard Incubators is controlled by a high quality Microprocessor controller. This controller is highly accurate and reliable and shows the current temperature of the unit and any alarm codes on the screen.
