brumaba

brumaba caddy

High performance, solid technology and elegant design were the touchstones when developing this high-end unit. A quality product offering patients the comfort they have every right to expect. The caddy is simple to use, infinitely variably adjustable, robust and exceedingly space-saving.

The 7 advantages of the caddy:

- 1 **Frame:** High-end model in solid stainless-steel.
- 2 **Two Steering Handles:** Simply twist and press the freely variable handles into the desired position.
- 3 **Armrest:** Automatically adjust to the position of the chair and can be separately folded up.
- 4 **Upholstery:** Comfortable shape and high level of hygiene due to seamless and washable up-holstery. Available in 41 colours.
- 5 **Seating:** Anatomically designed laminated beech-wood panels lend an attractive touch, underlining the superb quality of the seating.
- 6 **Multi-Directional Rolling Castors:** The pleasingly designed wheels allow for simple and accurate transport.
- 7 **Headrest:** Easily adjustable with gentle pressure.

Laminated panels are now available in **dark brown**.

Comfortable chair**Chaise longue position****Excellent relaxation position****Stable feet-raised reclining position**

Whether sitting, reclining or transporting, the caddy gives you the option to modify the position. The patient can get into and get out of this comfortable, well-designed chair both easily and safely.

The caddy is the perfect choice for the safe transportation of patients. Even longer periods in the caddy are pleasant and relaxing. The caddy has also demonstrated itself to be robust and suitable for emergency situations (reanimation).

This high quality brumaba allrounder will soon win your complete approval.
