High
Efficiency

Remote Control
Operation

Welcome to the innovative Paxum X300 Fully Automatic Pallet Wrapping Machine. The X300 provides consistent pressure on your goods whilst wrapping with the Motor Drive Top Plate, ensuring secure packaging. Our machine uses high-quality Paxum Machine Stretch Film, providing excellent load stability and containment during transportation and storage.

Highlights

- **Top Pressure Device:**

Our industrial-grade Electric Pressurizing System ensures stability and prevents scattering and displacement during the wrapping process. With a pressurizing stroke of 500mm-2000mm, it is suitable for a wide range of applications.

- **Automatic cut and clamp film:**

The Paxum X300 Automatic Cut and Clamp Film System eliminates the need for manual film cutting and application on pallets. It automatically cuts and clamps the film, saving time and effort for workers. Say goodbye to manual film handling.

- **SIEMENS control system:**

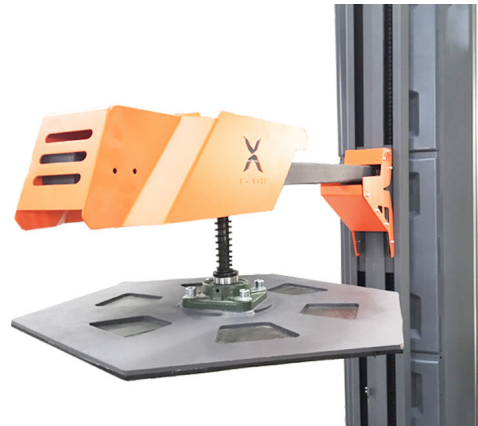

When investing in a reliable and durable machine, the quality of its electrical components becomes crucial. Using inferior electrical parts poses a significant risk, as a malfunctioning component can halt the entire machine's operation. Repairing electrical issues can also be challenging, as identifying the specific faulty part is often complex. That's why our pallet stretch wrapping machines exclusively utilize renowned brands for all electrical parts. We prioritize the seamless functionality of our machines to ensure long-lasting and trouble-free operation.

- **LCD touch operating system:**

Paxum X300 pallet wrapping machines feature state-of-the-art IoT intelligent touch screens that offer flawless responsiveness and functionality. The touch screen allows direct adjustment of turntable speed, up/down speed, and film carriage speed. We provide six pre-set wrapping models to accommodate various pallet types, eliminating the need for frequent parameter adjustments. Simply select the appropriate model for your pallet, streamlining the wrapping process.

- **Remote control system:**

Our machine offers convenient remote-control operation, allowing for easy start and pause functions. Each remote control is dedicated to controlling a single device, ensuring simplicity and efficiency in operation.

Top Pressure Device

Automatic Cut & Clamp

Remote Control Operation

Features

- High efficiency, low electricity consumption, easy operation
- Customizable wrapping type and frequency
- Automatic pallet height detection with photoelectric sensor
- Auto reset of turntable
- 300% pre-stretch ratio for optimal film usage
- Programmable control with optional frequency converter
- PLC control with manual option
- Adjustable wrap cycle (top, bottom, reinforcement)
- Variable lift speed and film tension control
- Automatic film cutting and clamping
- Remote control for convenient machine start
- 3 Year Warranty

Specifications

Maximum wrapping speed	15-25 loads/hour	Turntable Roller	Double Nylon Roller
Max Wrapping Height	2200mm	Up & Down Drive	Belt
Max Wrapping Weight	2000KG	Up & Down Guideway	Double Balance Device
Turntable Speed	0-13RPM(Adjustable)	Inverter	SIEMENS
Turntable Size	1650mm	Photoelectric sensor	SICK(Germany)
Turntable Drive	0.75PH Chain Drive	PLC	SIEMENS(Germany)
Cut And Clamp Film	Automatic	Travel Switch	OMRON(Japan)
Machine Size	L:2800mm W:1650mm H:3250mm	Motor	GPG(Taiwan)
Machine Weight	800KG	Relay	OMRON(Japan)
Standard Pre-Stretch	300% pre-stretch	Reducer	GPG
Film Capacity	250mm Diameter	Position switch	SICK(Germany)
Standard Film Width	500mm	Touch screen	X-LINE/SIEMENS
Film Delivery System	Power Pre -Stretch	Contactor	SIEMENS
Packing Force	Changeable	Warranty	3 Years
Intelligent-Sensor	Standard		
Rope Grip System	Optional		
Safety Device	CE standard		
Alarm System	Available		
Top Pressure	Motor Drive/600 2200mm press height		
Ramp	optional		
Frame	Steel+ABS		
Printing	Metallic Pain		
Fall-proof	Inside Safety Belt		
Cutting	Laser
