

Void Fill Machine

Crimped Kraft Paper

#27930

**Automated Void
Fill**

**Durable
Materials**

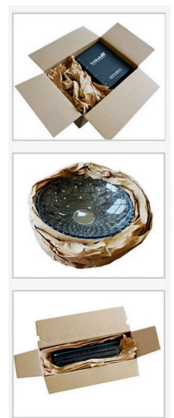

**Environmentally
Friendly**

**High-speed
output**

The Crimped Kraft Paper Void Fill Machine is an advanced paper cushioning system designed for void filling and light load blocking. This machine efficiently fills empty spaces in packaging with eco-friendly kraft paper, providing both protection and an enhanced unboxing experience. With a high-speed output of 120m/min, a long-lasting blade, and an extremely low jam rate, this machine offers reliable and efficient performance for various packaging needs.

Features

- Durable BLDC motor, cuts 50-90 gsm
- High-speed output, 120m/min
- Packaging Material is 100% recyclable
- Easy loading, low jam rate
- Quick disassembly, customizable paper length
- Multiple modes: loading, pedal, auto, counter
- CE certified, quiet (<65dB), safe design
- No-paper/jam alarms, auto recovery, adjustable height

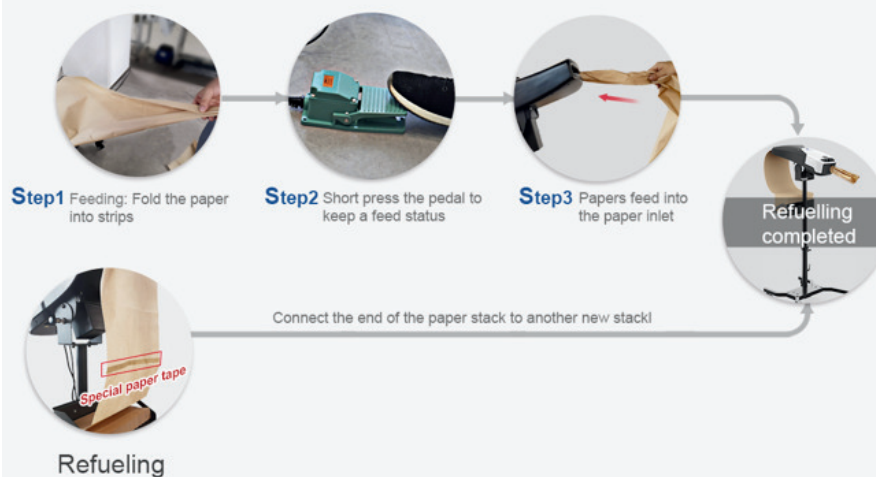

Specifications

Feed Speed	72m/min
Cutting Speed	50 times/min
Machine Weight	17kg
Stand Weight	19kg
Power	150W
Voltage	100~240V
Cushioning Paper Length (m)	0.25-4.5
Machine size (mm)	665(L)x665(W)x1450-1850(H)

15 seconds fast feeding and changing paper, simple and easy to operate

Feed papers into inlet then paper will be easily loaded by pressing the foot pedal

See me in action!
