

# Washer

## Model TW- 02

The TW02 is a compact, high-efficiency tipper washer designed to streamline your wash process with reliability and ease. Its tipping-action cradle allows fast loading and unloading, while powerful water agitation delivers thorough cleaning of a wide range of produce.

- Capacity: 25 to 40kg per cycle
- Electrical req: 3 phase 415volt 50Hz
- Dimensions: 1700 x 1000 x 1200 mm
- Water consumption: product dependent
- Weight: 220kg
- Motor: 1/2HP & 2HP

**Streamlined Batch Washing:** The TW02 uses a hydraulic tipper cradle for fast loading and controlled unloading, creating an efficient batch-wash workflow ideal for small-medium processing operations.

**Consistent Cleaning Performance:** Continuous water circulation ensure uniform washing, effectively removing soil and debris from a wide range of produce types.

**Compact & Durable Design:** Built with stainless steel construction and quality components, the TW02 offers long-lasting reliability while maintaining a compact footprint for space-restricted facilities.

**Improved Workflow Efficiency:** Smooth tipping discharge and simple operator controls reduce manual handling and labour time, helping maintain a steady processing pace throughout the wash line.

**Versatile Produce Handling:** Suitable for a variety of fresh produce, the TW02 delivers dependable cleaning results regardless of product shape or density, making it a flexible solution for diverse applications.
