

CUTLERY POLISHERS

WAREWASHING SOLUTIONS PTY LTD

PH:1300 217 411

WWW.WAREWASHINGSOLUTIONS.COM.AU

IMPROVE YOUR BUSINESS

Are you looking to save costs in your catering facility this week?

We can reduce your staff costs on a labour intensive repetitive job and give you a far better result. Your cutlery needs to be perfectly polished – your customers expect nothing less.

Warewashing Solutions is a leading supplier of commercial quality warewashing equipment

Effectively remove watermarks

Achieve a consistently high sheen

Reduce labour costs & free up your waiting staff

Remove the need for both purchase and disposal of paper towelling

Reduce towel laundry costs

Give a much faster cutlery cleaning turnaround rate

Eliminate cross-contamination from dirty cloths

This machine saves time, saves money, saves labour and produces an unbeatable shine!

How much time you can save if you don't have to spend hours polishing your cutlery by hand.

Our machines cost from as little as \$49 a week.

If you have any questions or would like to place an order, please do not hesitate to contact us at INFO@WAREWASHINGSOLUTIONS.COM.AU or Phone 1300 217 411

Savings / Benefits

You will be surprised how much time and money you're wasting on skilled staff standing around polishing your cutlery.

Our Cutlery Polishing units are designed for restaurants, kitchens, cafes and coffee shops with two clear intentions; unbeatable quality and cost saving.

Quality

It's pretty easy for staff to get bored hand polishing cutlery, very often not doing the job very well leaving marks, streaks and wasting even more staff time fetching fresh cutlery when the guest complains!

Cutlery Polishers never get tired.

They just keep on going as long as you need them to, hitting an incredibly high quality level of perfect polishes without ever missing a spot or only doing half the job; and even better, they don't leave damp dirty towels lying around after they've finished.

Hygiene benefit is that our dryer polishers sanitize at high temperature above 80 degrees C; the same temperatures used to sanitize in your dishwasher, This ensures that both the cutlery and granules meet sanitizing codes, whilst human hands and dirty polishing cloths can add bacteria, our higher temperatures makes sure that when the cutlery or items leaves the polisher, it's virtually sterile!

Cost saving

Cutlery polishers are fast, and after the initial purchase are economical to run, saving you money in time and labour

Stop buying and disposing of all that polishing cloth.

Our polishing granules last longer, are far more hygienic and do a better job!

Stop wasting wages on waiting staff polishing spoons!

Larger restaurants may even be able to reduce the number of staff they need

Cut down on your cutlery stock! Our units process cutlery fast so it's back out on the tables in no time.

Warewashing Solutions machines offer 120 day /600 hour Granule media replacement recommendation, saving on both consumable and servicing labour costs

REAL SAVINGS

See how much you can save! We're so sure of the money saving ability of all our machines you can calculate it in the table below; the higher the wage gets the more money we keep saving our clients!

	Example 1	Example 2	Example 3
No of heads served per week	1000	1000	1000
Items of cutlery per head	4	6	8
Items of cutlery used per week	4000	6000	8000
No of man / wk hours to polish cutlery based on the industry standard of 500 per hour	8hrs	12hrs	16hrs
Cost per week to hand polish cutlery based on minimum wage of \$21.00 /hr	\$168.00	\$252.00	\$336.00
Cost to hire a mini polisher (per week) from \$9 per day	\$ 63.00	\$ 63.00	\$ 63.00
Granulate costs average / week	\$ 5.00	\$ 7.50	\$ 10.00
Maintenance costs per week	\$ 3.00	\$ 3.00	\$ 3.00
Power costs at 500W per hour of use based on hours user per day	\$ 5.00	\$ 7.50	\$ 10.00
Total weekly cost of the polisher	\$ 76.00	\$ 81.00	\$ 86.00
Total savings per week	\$ 92.00	\$ 171.00	\$ 250.00
Total savings per year	\$ 4784.00	\$8892.00	\$13000.00

TAMAI dryer polisher factory recommendation for granule replacement is 120 days or 600 hours, Giving maximum savings on granule and labour costs.

CUTLERY DRIER POLISHER

How It Works

- ▶ Warewashing Solutions Cutlery Polishers deliver consistent, top quality polish and shine every time.
- ▶ What's more it's simple to use and removes all of those damp and unhygienic towels and polishing cloths from your environment entirely.
- ▶ Take your clean and wet cutlery straight from the dishwasher and place it into the patented circular tank, which is made to allow cutlery to virtually swim up and out of the machine. a food safe exit is designed to protect your cutlery from scratching.
- ▶ The machine draws the cutlery through the heated dry grain granules; this removes out all the moisture, whilst gently rubbing off water marks and polishing silver or steel to incredibly high quality sheen.
- ▶ The temperature creates a sanitizing stage on both cutlery and granules, killing bacteria. the cutlery travels with the vibrating granules to the top and passes out, maximizing time and temperature for hygiene and delivering the perfect knives, forks and spoons to your diners.
- ▶ As you can see, it takes just a few seconds to place the cutlery in the machine; how long does it take your staff to hand polish it?
- ▶ Whatever your volume of business we help all sizes of kitchens, restaurants, schools, hospitals, pubs, coffee shops and cafes save money and time;
- ▶ Contact us today on 1300 217 411 to speak to one of our knowledgeable team and work out how much simpler one of our units can make your working day!

GLASS POLISHER

up to 350 glasses per Hour

Glass Polishers dry and polish glasses taking the time and effort out of hand polishing, providing a cleaner and more hygienic finish in a few seconds. The brushes are made of natural and absorbent fibres, adaptable to different glasses and cups increasing the efficiency of the drying & polishing process. Removing water stains and marks through a combination of hot air, rotation and the drying action of the rollers, Glass Polishers leave glassware crystal clean. With an attractive and durable stainless steel finish, the GPol1 is easy to keep clean and light enough to be easily portable.

Voltage: 220-240V AC50/60Hz 1150-1350W 5.4A

Capacity: up to 350 glasses per hour

Dimensions: 325 x 300 x 500mm

Weight: 15.5kgs

Air Flow: 164 CFM

Hot Air Temp: 55-60C

RRP Price \$2250.00 + GST

FINANCE AVAILABLE

We work with Silver Chef, Flexi Commercial and ProspaPay as all companies offer a different way of financing.

Rent-Try-Buy® is a 12 month rental agreement with several flexible options. Silver Chef purchases the equipment and rents it to the customer.

Purchase at any time and receive a 75% net rental rebate on payments made in the first year.

Upgrade at any time, so long as the equipment is like-for-like and bigger and better.

AT THE END OF YOUR AGREEMENT YOU CAN
Rent with no long term agreement.

Return the equipment with no further obligation.

End of term options: Choose from one of our loyalty offers, where you can work towards ownership and receive a discounted weekly rental price.
