

# Mobile Grab Handles

*The patented System Mobile from ROTH is a practical helper, which has proven itself for years in everyday life for disabled and elderly people. Available in fixed or telescopic lengths to get the best solution.*

---

The mobile handles are quick and easy to fit and just as easy to remove. Both vacuum pads with a diameter of 120 mm can be pressed simply on a flat, non-porous surface, turn on the vacuum rocker – that's it.

All handles are made to a high standard and certified by the south German TÜV, have a strong adhesive force and are available in different lengths.

## Key Features

### Telescopic handle

Developed so that it may be fixed regardless of tile structure and has a default diameter of 35mm

### Vacuum pads

Made of special rubber. Also suitable for tiled surfaces in the bathroom which are slightly textured.

### Quick locking

All Mobeli grab handles can be fixed without tools and easily dismantled for travelling. Like all metal parts, the quick lock is made of stainless steel.

### Safety indicator

The safety indicator of the Mobeli handles is simply revolutionary. This is a world premiere: the first handle which monitors the vacuum's strength and therefore the adhesive force. The Mobeli safety rocker constantly monitors the vacuum. When the warning rocker is fully lowered, the adhesive force is at it's strongest and the handle is safe to use. If the warning rocker is raised showing the red warning rim, the Mobeli vacuum pads needs to be removed and reset. People with visibility impairments can touch the safety indicator and know by touching whether it's safe or not.

# QuattroPower Support System

*Quick and firm hold without drilling. Just position the QuattroPower supporting system, press down the vacuum tilting lever – that's it.*

*You now have a reliable aid forgetting up on all plane and pore-tight surfaces.*

The supporting system (QP) QuattroPower Support with its four suction pads distributes the leverage forces acting on the wall. Advantage: It can even be attached on tiled cavity walls (e.g. sandwich plaster board planking), thus eliminating the need for expensive rebuilding to reinforce the walls so that screw-on grab handles might be attached.

The QuattroPower Support supporting systems have a nominal carrying load of up to 80 kg.

Products held in stock:

1400265S QuattroPower Support  
Grip length 565mm  
Nominal load 80kg
