

product information sheet

ABSORB ECO IBC BUND

- Working Load Limit: 2,000 kilograms
- Bund Sump Capacity: 1,200 litres
- Size: 1,416mm x 1,416mm x 900mm

WHAT IS AN IBC?

Intermediate bulk containers are used for the storage and transport of chemicals and waste.

IDEAL FOR

IBC bunds are ideal for protecting IBC's containing a wide range of chemicals including most Class 5 and Class 8 Dangerous Goods.

TIPS

If storing outside, a PVC cover and frame should be used to prevent rainwater entering the bund.

This product is manufactured in Australia from polyethylene resin, which contains 30% post-consumer recycled material.

Each bund contains the equivalent of 497 recycled 2-litre milk containers which would otherwise go to landfill.
