

Tenso® SLB

Battery Powered Steel
Strapping Combination
Tensioner -19mm

#61807

Innovative Design

Industry proven, high quality tool with outstanding reliability and unparalleled ergonomics

Increases Reliability

Provides improved consistency and accuracy of tension levels for sealless joint applications

Simplifies Operation

Lightweight design coupled with one-button operation helps reduce operator fatigue

Lowers Operating Costs

Offers significant cost-savings compared to the high cost and operational inefficiencies of pneumatics

The Tenso SLB – Battery Powered Steel Strapping Combination Tensioner – 19mm, is the ultimate solution that effortlessly blends powerful tension and high speed for unmatched performance in steel strapping. Crafted for peak efficiency, this state-of-the-art tensioner works automatically and comes packed with features that elevate its performance, making it the go-to choice for diverse applications such as tin plate, cut-to-length sheets, tubes, pipes, ingots, steel, large coils, and more.

Features

- Integrated Bluetooth technology with a mobile application allows wireless access to operational settings
- Fewer moving parts requiring less maintenance than pneumatic tools
- Fast charge Lithium Ion battery technology
- Lightweight design with one-button operation simplifies process and helps reduce operator fatigue

Specifications

Performance	High tension
Adjustable Tension	6672 N (Up to 1,500 lbs)
Strap Type	Steel Strapping
Strap Width	19 mm (3/4")
Strap Thickness	0.43 mm – 0.63 mm (.017" – .025")
Seal Type	Sealless strap joint
Joint Type	3-key
Cycles Per Charge	100+
Battery	18v 2Ah Li-ion
Recharge Time	Full: 30 mins; 80%: 20 mins
Tool Weight	6.35 kg (14 lbs) including battery
Dimensions	368.3 mm x 174.75 mm x 133.35 mm
