

GEDA® STAR 250 COMFORT

Lightweight swivel arm hoist

Easy material transport even
under difficult conditions

Assembly can be conducted by
one person

Versatile attachment options

Variety of load carrying devices

GEDA STAR 250 COMFORT

Construction workers from all sectors have known and appreciated the benefits of the GEDA STAR 250 COMFORT for decades. Whether new build projects or renovation work: the versatile rope hoist impresses with high load capacities and very easy material transport, even under difficult conditions. The extensive range of different load handling devices such as bucket holders, plate grabbers or rock baskets allow the rope hoist to be ideally adapted to the requirements on site. One particularly convenient feature is that the compact devices can be installed in any location at the scaffolding, in a window, between stories or on the roof. The electric winch can be separated from the swivel arm, allowing installation by one person.

Technical data:

250 kg

25/50 m

28 m/min

1 kW/230 V/50 Hz/16 A

**For easy material transport
even under difficult conditions**

Versatile fixing devices:

Scaffold clamp
Convenient scaffold clamp for 1½" tubular scaffolds
Art. No. 01860
