

X-CPR

X-CPR (Simultaneous Sterno Thoracic CPR System)

Key Features

- Simultaneous Sterno Thoracic CPR (SST-CPR) system
- Air powered consistent compressions
- 4 simple application steps

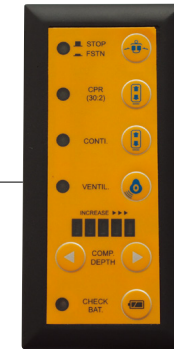

- 5 steps adjustable compression depth
- Combinable with ambulance stretcher
- Compression Frequency : 100times per min

Specifications

- **Input**
 - Range of Input Oxygen Pressure : 3.5 ~ 6.3kg/cm²
 - Relief Valve Operation Pressure : 9kg/cm²
 - Medical Grade Hyperbaric Oxygen
- **Ventilation**
 - Range of Volume Control : 240 ~ 700ml
 - Inspiration Period : 1.0sec (fixed)
 - Relief Valve Operation Pressure : 55 CmH₂O
- **Compression**
 - Compression Frequency : 100 compressions per minute
 - Compression Depth : 0~5cm
 - Compression Modes : 30:2 / Continuous compression

- **Physical Specifications**
 - Size : 52cm x 45cm x 7.5cm (LxWxH)
 - Weight [NWT] : 11.5kg

- Operated by remote controller
- Stop / Fasten
 - 30:2 / Continuous CPR
 - Ventilation
 - Compression Depth
 - Internal battery status
