

# Niftylift BIN LIFTER

A manually operated bin lifter that aids in the lifting and tipping of wheelie bins—weighing up to 30 kg—into steel skip bins.

The assisted lift and slow-release gas-struts lift bins safely, while protecting the user from costly back injuries associated with lifting heavy loads above shoulder height.

Made in Australia.

## Typical applications

Suitable for retail outlets, offices and factories.

## Features

|                                       |                      |
|---------------------------------------|----------------------|
| <b>Lifting</b>                        |                      |
| Capacity:                             | 30 kg                |
| Mechanism:                            | Full-swing           |
| <b>Recommended use</b>                |                      |
| Per person per day:                   | 2 lifts              |
| <b>Bin compatibility</b>              |                      |
| Wheelie:                              | 120 and 240 litre    |
| Skip:                                 | Up to 1500 mm        |
| <b>Operation</b>                      |                      |
| Method:                               | Manual assisted lift |
| Time:                                 | 45 seconds           |
| <b>Dimensions (L/W/H)</b>             | 900/800/1420 mm      |
| <b>Highest tip point</b>              | 2850 mm              |
| <b>Fits through internal doorways</b> | Yes                  |

## Safety features

- Skip bin hooks: Secures the bin lifter to a steel dumper bin, and only operates when secured.
- Padlock: The unit can only operate when unlocked.
- Slow-release gas-struts: Ensures the bin won't suddenly drop and potentially cause injury.
- Base cradle hook: The unit can only operate when the bin is resting on the base cradle hook.
