

A101 Can Crusher

The Mil-tek A101 Can Crusher crushes and compacts tins, cans, drums and buckets up to 30L, reducing volume by 90%.

- Crush tins, cans and drums up to 30 litres
- Improved operational and safety features
- Hazardous and non-hazardous fluids
- Low on noise, low on energy
- Up to 90% compaction
- Use indoors or out
- Small footprint

Product Overview

Containing no electrical parts, the small size, heavy-duty Mil-tek A101 Can Crusher is both easy to maintain and easy to clean.

Many tins and cans contain hazardous waste such as oil or paint, the removal of which can be very expensive.

The Mil-tek A101 Can Crusher reduces the volume of these by up to 90%, allowing you to reduce the number of waste bins, the number of lifts required and to reduce your costs by up to 80%.

The Mil-tek A101 Can Crusher is powered by compressed air, either directly from an existing air-line or from a compressor supplied by Mil-tek.

This means that the Can Crusher is free of both electrical and hydraulic components, minimizing the risk of fire and completely eliminating the risk of oil contamination.
