Timed Flow Lever
Pillar Tap

INSTALLATION NOTES

- 1) Fixture strength is ultimately determined by the load capacity of the supporting structure (noggins recommended for stud walls) and use of appropriate fixings. 2) Basin is secured to wall with an offset bracket positioned behind the rear/top of the basin. 3) Two additional fixing points are integrated into the basin body near the base (fixings not supplied). 4) Remove access panel in base to fit off plumbing and wall fixings then replace panel. 5) P trap not supplied.

Base Panel screw-fixed
from underneath with
M4 Button Head Allen Screw

Trap not supplied

Optional Tap shown for indicative purposes only.
