Focus 3 Phase Piston Compressor

MODEL EBP100-300

Piston Compressors use the reciprocating motion of one or more cylinders to compress air efficiently. When selecting a piston compressor, it's important to consider both your pressure (psi) and airflow (cfm) requirements.

Our EPB range delivers reliable performance with flow rates from 14 - 50 cfm, making them an ideal choice for small to medium-sized operations.

SPECIFICATIONS

Model	Motor Power	Pressure (BAR)	Flow Rates (CFM)
EBP100-300	7.5KW	8	37
Drive Type	Belt		
Outlet Size	1/2"		
Dimensions L/W/H	1600/650/1310 MM		
Tank Size	300L		
Weight	320KG		
Circuit Breaker Required	25 AMPS
