## ASO Ankle Stabiliser - All Sizes

### ANKLE STABILISER – ALL SIZES

The ASO ankle brace is one of the most popular supports for the protection against and treatment of ankle sprains.

Reduces ankle sprain injury!

### KEY FEATURES

- **Stabilising straps:** Form a figure-eight to protect and support the ankle
- **Elastic cuff closure:** Stabilising straps and secures laces
- **Low profile:** Will fit in any type of shoe
- **Bilateral design:** Each size fits left or right foot
- **Ballistic nylon boot:** Provides tremendous strength and durability

Measure ankle circumference from the base of the heel to the dorsal ankle crease.

US manufacturing with higher quality control standards. Two very common ankle injuries are inversion (when the ankle rolls in) and eversion (when the sole of your foot faces away from your other foot).

While some inwards (called pronation) and outwards movement (supination) of the ankle is required for normal activity, excessive rolling can cause serious ankle injury.
