

The Multiplier: A Desktop Pressure Former

Pressure forming with the Multiplier will:

- Capture more detail
- Enable the use of thicker materials
- Form at higher temperatures
- Make longer lasting & higher quality molds
- Have factory level production on your desktop
- Automatically updated using Mayku's first smart machine
- Make silicone quality molds
- Make injection quality molds

Key features:

- Injection mold quality
- 0.0003mm resolution
- 10mm material thickness with reducing plate, 5mm without reducing plate
- Dozens more materials including polycarbonate and flexible sheets
- Circular 400mm bed — max design space of 380mm and height of 160mm
- Up to 4 bar of pressure for incredible detail
- Make high quality molds in 4-minutes
- Wifi connectivity for firmware upgrades, new material releases, and new functions to the machine
- High contrast LCD display
- First-ever pressure forming from the desktop

Consumables & Accessories:

- Works with sheets from 0.1mm to 10mm
- Pressure gun for easy template removal
- Reducing plate for rectangular design space option
- Firmware update for different materials
- Range of pourables
- + More in the future

Logistics:

- Dimensions: 685 x 600 x 600 mm
- Weight: 70kg
- Manufacturing in China

A process used
in industry to make
precision parts fast.
Never before brought
to the desktop.
