VALUE PROPOSITIONS

PATIENT BENEFITS

CLINICIAN BENEFITS

01 COMFORTABLE

02 LIGHTWEIGHT

03 FUNCTIONAL TASK TRAINING

04 FAST SETUP

05 PASSIVE/ACTIVE EXERCISES

Higher Training Intensity

Longer period of training with higher intensity and minimal supervision with action observation therapy

Comfort

Fully made of light fabric and bio-compatible materials. Offers top comfort and supports natural movements

Light Weight

Less than 200 gram, just like wearing a normal glove

Functional Task Training

Trains patient in performing critical functional tasks in daily living, such as gripping and tripod-pinching, while interacting with real objects.

Fast Setup

User friendly user interface and device design with minimal training required

Passive & Active Exercises

Combine both passive and active exercises and support maximum range of patients
