Easi Rider Electric Ride On Trolley Tug

Australian designed and manufactured, this new robust and heavy duty 'ride on' tug offers impressive manoeuvrability and towing capacity.

Other Features and Benefits

- Customised Tow Hitch can be designed to client's specifications
- Single, simple to use Joystick provides operator with finger tip control of all movement in both forward and reverse drive modes. This includes starting, stopping, rate of acceleration and deceleration. overall speed and all changes of direction in a 360° radius
- Ultra smooth motor drive system, an exceptionally stable 'ride on' platform and ergonomically designed drive controls ensure operator comfort
- Compact dimensions and a sophisticated drive system enable this ride on tug to manoeuvre very effectively in confined spaces, allowing the operator to access standard lifts and doorways in virtually any healthcare facility
- Safe to use on ramps and gradients up to $\pm 7^\circ$
- Bluetooth™ connectivity for improved diagnostic feedback and usage history
- Max speed of 5km/h
- Max towing capacity of 1500kg on both flat surfaces and ramps (up to $\pm 7^\circ$)

Single Joystick controls all movement

Additional operator controls include Max Speed Adjustment Knob, On/Off Switch, Horn Button and Battery Gauge LEDs
