Why Choose Frigerio?

Genuine quality products and a passion for a dream.

Entering the world of Frigerio Living lets you share our passion for the most stunning Italian design.

A vision that brings out essential shapes, returning to authentic design, for a perfect blend of yesterday and tomorrow, to live today!

All Frigerio folding arm components are designed to meet ISO 9001 standards, the key to achieving this is in the strength of extruded aluminium profiling, as opposed to lower strength metal casting.

INNOVATIVE PRODUCT

- Unique Italian design and style.
- Exclusive product range.

BACKED SERVICE

- Frigerio approved product warranty.
- Technical / installation service.

QUALITY WORKMANSHIP

- The best in quality durability and style.
- ISO 9001 certified.
- Extruded aluminium profiling.

Styles of Folding Arm Awnings

Brasil - 8000 Series

Fabric Range

Colour Rich

The colour of the acrylic fabric is locked right into the very core of the fibres during manufacturing. Dyed all the way through, this type of yarn ensures exceptionally long-lasting, ultra vivid colours.

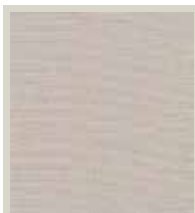

Fabric Type

The surface of the acrylic fibre has been modified to give it more body and improve its insulating capabilities, making the fabric more "closed" and thus harder to penetrate, so you can enjoy better UV protection.
