Experts in Complete Test System  
Solutions, since 1979

# Moisture Determination, Chloride Assessing & Bond Testing

## Moisture Meter for Sand & Aggregates

The Aggrameter® is a portable microwave meter for rapid & accurate determination of moisture content in sand and other fine and coarse aggregates.

## Chloride Ion Assessment

The Chlorimeter™ is a field kit for the determination of chloride ion content in concrete, fresh cement, masonry, most construction materials & water.

## Measuring Bond/ Tensile Strength

The James Bond Test is the ultimate solution for measuring bond or tensile strength of concrete, asphalt, tile and concrete repairs.
