# MAGNUM IS A TRUE SHAKE-UP!

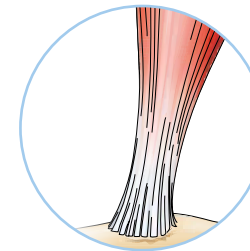

## BEFORE

Shock waves spread through the impaired tissue.

## DURING

Shock waves stimulate cells responsible for tissue reparation.

## AFTER

Tissue regenerates and heals.

The products, the methods of manufacture or the use may be subject to one or more U.S. or foreign patents or pending applications. In Australia BTL Radial Shockwave Therapy is a non-invasive therapeutic device using acoustic waves in order to stimulate local biological response of the treated tissue. Biological response includes decrease of local pain sensation, muscle relaxation and increase of blood microcirculation resulting in local metabolism enhancement and local trophic improvement. The device can be used to treat chronic tendinopathies, insertional pain, pain related to trigger points (myofascial pain syndrome), calcifications and chronic inflammations. ARTG: 409351
