Starter portable sawmill with premium quality features including a strong steel sawmill frame, durable laser cut steel bed, reliable 9.5HP KOHLER gas engine, convenient sawdust management, efficient quick-set log handling, and more!

### Description / LX50START Portable Sawmill

START sawing logs into lumber, slabs, and more with the exceptional value LX50START portable sawmill! Combining premium quality features with an entry-level price, the LX50START is one of the best valued portable sawmills. This small portable sawmill can take on most of the softwood and hardwood logs you'll come across with the ability to **saw 26" diameter logs with a 23-1/2" width of cut, 8" depth of cut, and 10' 2" length of cut.** Maximize sawing capacity with the rectangular throat design that provides full width sawing at any cutting depth or saw longer logs with optional 4' 4" bed extensions with no practical limit. The LX50START adds strength and durability where it counts with a **premium steel sawmill frame, laser cut steel bed, diagonal bed crossbars for additional stability, and more.** Packed with
