HyPort R80

The HyPort R80 has been designed to meet the demands of different ICU layouts to create a safer, more efficient and comfortable ICU environment with patient-centric design. The R80 is capable of creating a reliable and streamlined ICU environment to ensure patient safety with a lighting system that provides a comfortable, near-natural light ICU environment to enhance patient recovery.

Features:

- 24-hour continuous monitoring of oxygen concentration with built-in alert system
- Proper exhaust system design
- Four light scenarios; Circadian, Examination, Reading and Navigation

HyPort 3000/6000

With an integrated, motorised lifting system, HyPort can lock your anaesthesia workstation or endoscopy devices and lift them off the floor. The devices can therefore be conveniently moved into the desired area and securely parked, providing a clean and efficient workflow. The brake system is the cornerstone for the pendant stability. Besides the standard friction brake, reversed pneumatic or electromagnetic can be chosen as an option for additional safety.

Features:

- Dual-brake system for maximum safety
- Advanced anaesthesia machine mounting solution
- Electricity gas outlets separated cavity design
- Ergonomic touch screen control platform
- Antimicrobial powder coating surface treatment

HyPort B30

Hospitals with limited space and budget, may search for a simple pendant solution to enhance the work efficiency and better care for the patient. Mindray HyPort B30 provides a simple, compact and cost-effective design for Anaesthesia Pendant and Surgical Pendant in OR and ICU.

Features:

- Less space needed with slimmer column design
- Easy to handle for nurse after reducing pendant weight
- Hygienic surface with anti-bacteria coating
- Built-in rails for accessories and no exposed screws
